

**Santa Fe Metropolitan Planning Organization**

*"Promoting Interconnected Transportation Options"*

**INVITATION TO A FREE WEBINAR  
ON  
IN-STREET BICYCLE PARKING: WHAT, WHERE, WHEN,  
AND HOW MUCH?**

**Date: Wednesday May 16th, 2012**

**Time: 1:00 – 2:00PM (MST)**

**Location: Room 326, 120 South Federal Place (Federal Building), Santa Fe, NM  
(Please note: Photo ID Required to enter the building)**

---

The Santa Fe MPO is sponsoring and hosting an Association of Pedestrian and Bicycle Professionals (APBP) Webinar titled “*In-Street Bicycle Parking: What, Where, When, and How Much?*”. Full details are below. Attendance is FREE. All that is asked is that you RSVP to Keith Wilson via email if you would like to attend ([kpwilson@santafenm.gov](mailto:kpwilson@santafenm.gov)). This webinar is open to all, so please forward this invitation onto others who may be interested.

---

**Webinar Details:**

Increasingly communities face the dilemma of bicycles and pedestrians competing for scarce sidewalk space. As pedestrian activity increases wider sidewalks are needed, while as cycling increases more bicycle parking—traditionally placed on sidewalks—is also needed. In-street bicycle corrals allow agencies to place bicycle parking in the street, off the pedestrian way, resolving this conflict and making more efficient use of existing parking spaces. However, jurisdictions may hesitate to undertake bicycle corrals since there are few design examples and little specific guidance on which to base such projects. Planners, engineers, developers and advocates should attend this webinar to learn how to scale up bicycle parking to meet growing demand while avoiding negative impacts to the pedestrian environment.

Placing bicycle parking in the street presents unique challenges for traffic engineers and streetscape designers. Issues include roadway operations, cyclist and pedestrian safety, placement of a bike corral in relation to other sidewalk and street design elements, pedestrian flows and adjacent land uses. The webinar will address these challenges with examples of successful in-street bicycle parking projects (examples from New York City, Portland, and Washington D.C.). Presenters will also define best practices for providing bicycle parking in the street and discuss how a program might progress, beginning with public process and moving through costs, installation, and maintenance.

**Presenters:**

Eric Anderson, City of Berkeley, California; Sarah Figliozzi, Portland Bureau of Transportation; Chris Holben, District Department of Transportation; and Hayes Lord, New York City Department of Transportation.

APBP has applied to the AICP for Certification Maintenance credit for this webinar. A certificate of attendance for those wanting to document Professional Development Hours will be available.

If you cannot attend the MPO Showing of this webinar, details on how to register yourself can be found at the following link: [http://www.apbp.org/event/May-16\\_webinar](http://www.apbp.org/event/May-16_webinar)
