Santa Fe Metropolitan Bus Stop and Sidewalk Connectivity Assessment

OVERVIEW

The Santa Fe Metropolitan Planning Organization (SFMPO), has requested the assistance of a consultant to conduct a physical inventory, an ADA compliance, and sidewalk connectivity assessment of all bus stop facilities. A goal for SFMPO is to ensure that there are viable transportation options to the automobile in Santa Fe. A major component of this goal is to assess the connectivity of transit to pedestrian and bicycle pathways.

The purpose of this project was to identify activities that can take place to improve bus stops and pathways and ensure greater access for all. The objectives included:

- Improving ridership for transit.
- Ensuring compliance with Title VI of the Civil Rights Act.
- Reduction in pollutants.
- Easing congestion within various areas of the SFMPO planning area.

Connectivity takes place at the bus stop. The assessment included an evaluation of the bus stop and its connectivity to pedestrian pathways. The evaluation included:

- Reviewing each stop for:
 - Safety,
 - Accessibility,
 - Amenities, and
 - Site location.
- Connectivity to pedestrian pathways.
- Development of improvements.
- Prioritization of improvements.

SURVEY TOOL

A survey tool was developed in order to successfully undertake the inventory and assessment of bus stops. The tool consisted of four major categories including geographic identification, accessibility, signage, and amenities. The survey tool was electronically loaded onto a Global Positioning Satellites (GPS) enabled hand-held computer device. This device allowed all bus stop information to be digitally entered allowing for greater efficiency while also minimizing the number of entry errors normally associated with manual data entry. The following

provides a brief description of the information collected for each of the four major categories. A copy of the complete data dictionary is provided in Appendix A.

Geographic Identification

Information collected in the identification section helps to describe the location (on street and cross street), orientation, and position (nearside, farside, midblock) of the bus stop. In addition, the type of properties (residential, medical, school, retail store, etc.) adjacent to the bus stop was also documented, as these are indicative of the most likely trip generators of each stop.

Accessibility

The second section of the inventory form consists of two elements, the bus stop landing area and pedestrian connections. The landing area element documents the existence of a landing pad and assesses the overall size of the landing area (to determine whether or not a bus wheelchair lift could be deployed). The pedestrian connections element assesses whether there is a sidewalk that leads to the stop, and if there is a landing pad that connects to it. Additional information such as curb-cuts, nearest crossing opportunity, crosswalks, potential barriers as well as other pedestrian accessibility features were also collected.

Signage

In assessing the information features at each of the bus stops, the surveyor assessed any problems with the bus stop signage, the location, the availability and visibility of route/schedule information, and the existence of an information case.

Amenities

For added comfort and convenience, many bus stops have a variety of amenities. Such amenities include shelters, benches, and trash receptacles. These amenities and their existing condition were inventoried for each bus stop.

INVENTORY OF BUS STOP FACILITIES

As part of the inventory of bus stop facilities all of Santa Fe Trail's stops and 28 North Central Regional Transit District (NCRTD) and New Mexico's Department of Transportation's Park and Ride (NMDOT) stops were inventoried and assessed. The field survey period of the assessment ran from November 1st to 7th of 2015.

The survey instruments used in the inventory and assessment included:

- Trimble Juno 3B GPS Device,
- 6.5" Inclinometer,
- 24" Inclinometer,
- Tape Measure, and
- Safety Vest.

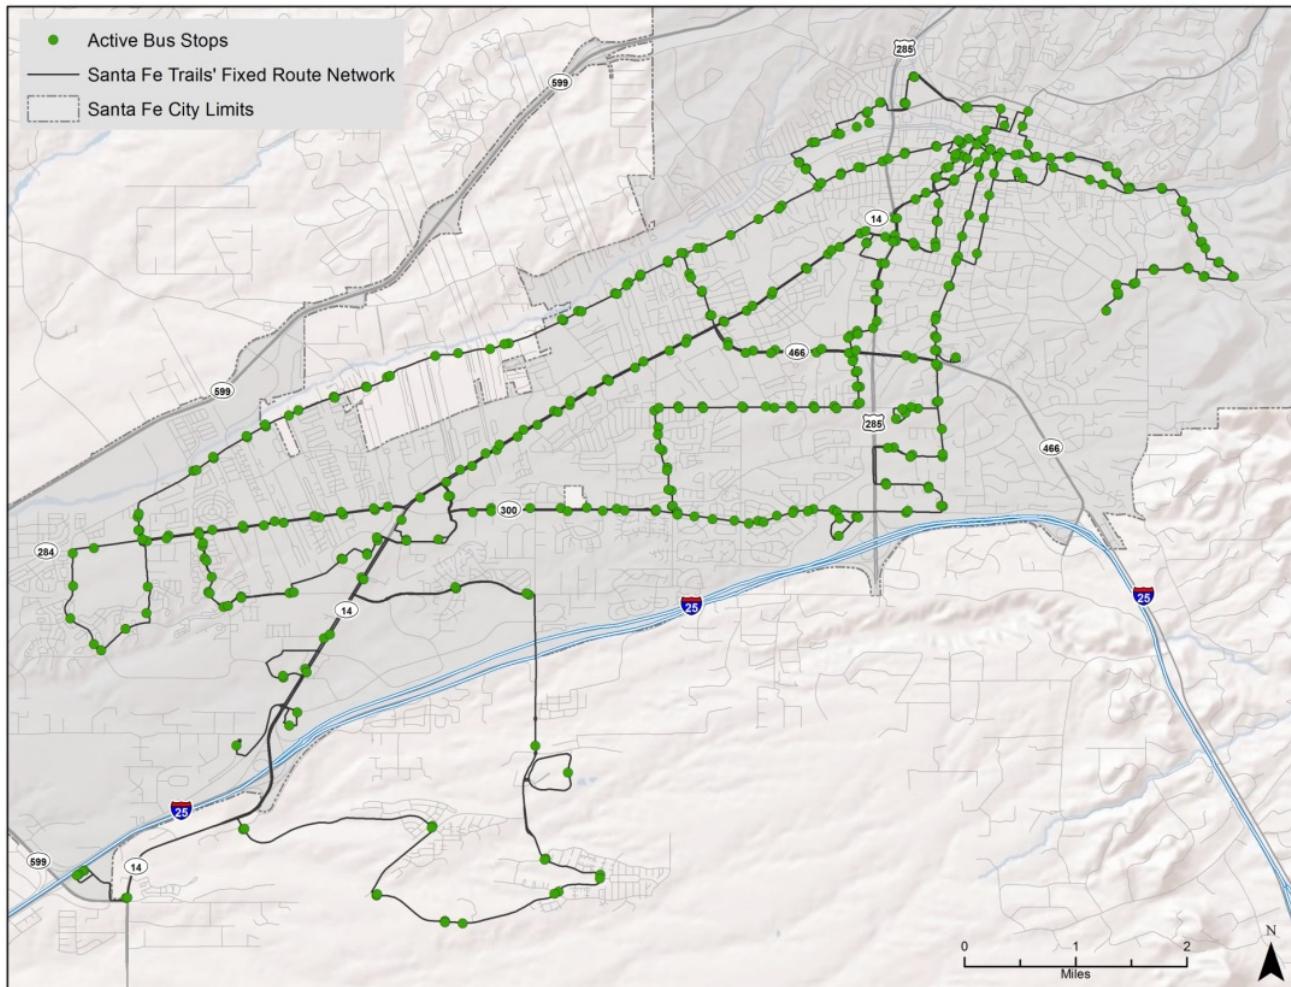

Survey Equipment

The City of Santa Fe's bus stop database and GIS shapefile indicated that there were 463 bus stop locations in and around the city limits. Upon completion of the inventory and assessment it was found that:

- There are a total of 433 active bus stops (shown in Figure 1).
- 43 bus stops were not found.
- 13 new bus stops were found.

Figure 1: Santa Fe Planning Area's Active Bus Stop Locations

Bus Stop Signage

Santa Fe Trail's bus stop signs are identical throughout the City. They include the Santa Fe Trails logo, a bus symbol with the words "bus stop," an ADA accessible symbol, no parking symbol, and a telephone number for contacting the transit system. Of the 433 bus stops in Santa Fe, 388 (92%) have a bus stop sign. Of those signs, 374 are mounted on dedicated bus stop poles, nine are mounted on utility poles, three are mounted on light poles, one on a traffic sign pole, and one on a shelter. Of those signs mounted on dedicated bus stop poles, 309 are installed directly into the ground with the remaining 65 installed in concrete or other improved surfaces. Bus stop signage statistics are provided on the following page in Table 1.

Under ADA guidelines, a bus stop sign that protrudes over 4 inches from a sign pole must be at least 80 inches off the ground measured from the surface to the bottom of the sign.

In Santa Fe, 342 of the bus stop signs meet this requirement whereas 46 do not. However, the Santa Fe Trail's bus stop signs, and those for other regional providers, are designed to circumvent this requirement as the edges of the signs protrude approximately 3 ½ inches from the sign pole.

During the assessment a number of bus stop signs were observed with damage ranging from graffiti to stickers to torn signs. Stickers were the most common form of sign damage and they were observed at approximately 10% of the bus stops with signage. Graffiti was also a widespread issue, it was noted at approximately 8% of the signed bus stops.

Table 1: Bus Stop Signage Statistics

Signage Information	Total	Percent	Signage Information	Total	Percent
Total Bus Stops	433	100.0%	Sign Height		
Bus Stops with Signage	388	89.6%	80 inches and Above	342	88.1%
Number of Signed Stops by Operator			Less than 80 Inches	46	11.9%
NCRTD	18	4.2%	Sign Damage		
NMDOT	15	3.5%	No Damage	315	81.2%

Other (Street Sign/Shelter)	2	0.5%	Other (Rust)	1	0.3%

Santa Fe Trails Bus Stop Sign

INFORMATION CASES

Thirty-two percent or 139 of the bus stops have an information case. These cases provide route schedules and maps for riders waiting at the bus stop. The majority of cases are the “bullet” design, accounting for 92 of the system’s 137 cases. The only other design observed was the flat sided information panels; a total of 47 of these cases were documented. Additional information on information cases is provided in Table 2.

According to ADA guidelines, in order for an individual in a wheelchair to access an information case there needs to be a clear ground area of 30 inches minimum by 48 inches minimum in front of the information being displayed. Sixty of the information cases included the minimum clear ground area while 39 did not meet the minimum space requirements or had some type of obstruction. Forty of the information cases were located at bus stops which did not have a paved surface. Of the 139 information cases, 13 were broken, 45 had graffiti present and eight were covered in stickers.

Table 2: Information Case Statistics

Information Case Information	Total	Percent

BOARDING AND ALIGHT AREAS

Boarding and alighting areas are included in the Department of Justice's 2010 ADA Standards for Accessible Design which provide the guidelines for the accessible design of bus stop facilities under Section 810 Transportation Facilities. The standards for boarding and alighting areas include a firm and stable surface, a minimum length and width for a clear unobstructed area, a minimum for the running and cross slope, and an accessible connection to a sidewalk, street, or pedestrian path. These requirements and results from Santa Fe are included in Figure 2.

Boarding and Alighting Areas

**Compliant Landing Pad****Landing Pad Obstructed by Bench****Landing Pad without a Sidewalk Connection**

BENCHES

A total of 167 bus stops have a bench for waiting riders. There are a number of distinctly different types of benches throughout the system. As seen in Figure 3, benches range from metal to stone to wood and also have subtle variations in design. Of the 167 bus stops with a bench, 90 of the stops (54%) only have a freestanding bench, 74 of the stops (44%) have a bench within a shelter, and three (2%) have both a freestanding bench and a shelter bench.

A total of 15 benches (9%) also have panels for advertisements on their back rests. During the assessment approximately 23 benches were either damaged or vandalized. The lion's share of damage came from graffiti; approximately 12% of benches had some type of writing or markings. Other types of damage ranged from broken pieces to unstable foundations to the presence of stickers. Table 4 provides detailed statistics on bus stop benches.

Table 4: Bus Stop Bench Statistics

Bus Stop Shelters

Bus Stop Shelter Inventory

A total of 80 shelters were cataloged during the field survey at 76 separate bus stop locations. Only 75 of the 80 shelters (94%) feature interior seating while all of the shelters have a brick or concrete foundation. Twelve of the 80 shelters (15%) have advertisement panels or displays. And a number of shelters were damaged or had been vandalized. Seven of the shelters (9%) were either missing a panel, had a broken panel or roof, or had excessive amounts of rust. Vandalism was noted at 25 shelters (31%) in the form of graffiti, spray paint, and stickers. Figure 4 maps each of the bus stops with a passenger shelter. The only bus stop with more than one shelter was the Santa Fe Place Mall Transfer Center which had a total of five shelters.

Santa Fe Trails Bus Shelter

Style H2 (4 Shelters)

Style H3 (2 Shelters)

Style I1 (19 Shelters)

Style I2 (8 Shelters)

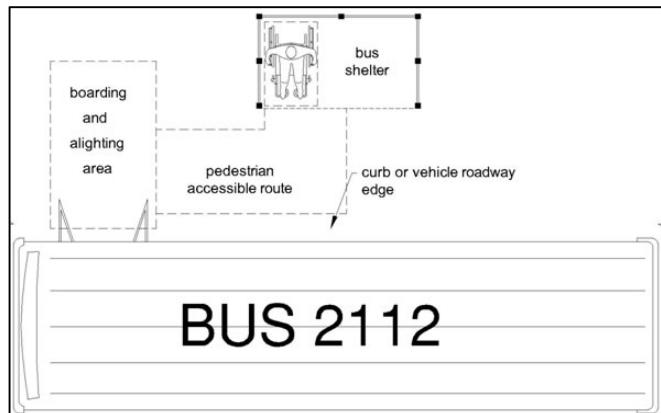

Style I3 (4 Shelters)

Bus Stop Shelter Accessibility Requirements

According to ADA guidelines each bus stop shelter must include the following:

- Stable, firm, and slip resistant ground surface.
- Any openings in the ground surface must not exceed $\frac{1}{2}$ inches unless perpendicular to the dominant direction of travel.
- Any abrupt vertical changes in level must not exceed $\frac{1}{4}$ inches in height.
- A clear ground space within the shelter measuring 30 inches minimum by 48 inches minimum.
- Connected by an accessible route to a boarding and alighting area.

Bus Stop Shelter Guidelines

Source: United States Access Board, Guidelines and Standards for Public Rights of Way

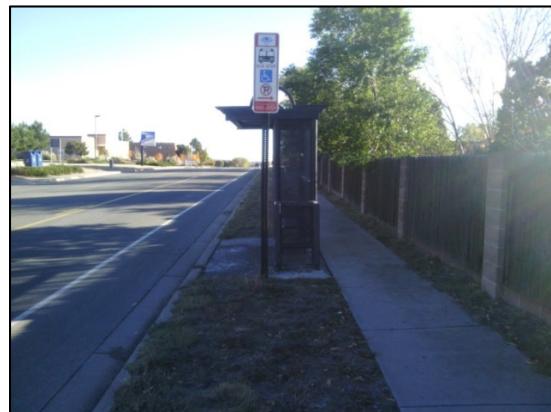

Five of the 80 shelters (6%) do not meet the accessibility guidelines. Two of those shelters were lacking an accessible path to the bus boarding and alighting area:

- 94094 – Cerrillos Rd. @ Second St.
- 96077 – S. Pacheco St. @ Opposite Post Office

Cerrillos Rd. @ Second St.

Shelter is Obstructing Potential Landing Pad and
There is no Sidewalk at the Bus Stop

S. Pacheco St. @ Opposite Post Office

Shelter is Obstructing Potential Landing Pad and
There is Not an Improved Path to the Sidewalk

Three of the shelters, all custom art shelters, did not have adequate interior space:

- 94035 – Airport Rd. @ Fields Ln.
- 94045 – Santa Fe Community College
- 94088 – Cerrillos Rd. @ Opposite Whole Foods

Airport Rd. @ Fields Ln.

Built in Bench Extends the Entire Length of the Shelter Preventing Adequate Interior Space

Santa Fe Community College

Built in Bench Extends the Entire Length of the Shelter Preventing Adequate Interior Space

Cerrillos Rd. @ Opposite Whole Foods

Roof of Shelter Does Not Extend Far Enough to Allow for an Adequate Interior Space

Table 5 provides detailed information for the bus stop shelters.

Table 5: Bus Stop Shelter Statistics

Shelter Information	Total	Percent	Shelter Information	Total	Percent

Style I2	8	10.0%	Yes	75	93.8%
Style I3	4	5.0%	No	5	6.3%

OTHER STOP AMENITIES

In addition to information cases, benches, and shelters, some bus stops also have other passenger amenities. The most common amenity in this category is trash receptacles. There are 80 bus stops with a trash receptacle accounting for approximately 19% of the stops in the system. Additional amenities include vendor publication boxes for newspapers and periodicals which are located at nine of the bus stops and bicycle racks at five of the bus stops. Table 6 provides a breakdown of the various bus stop amenities.

Table 6: Other Amenities Statistics

Other Amenities Information	Total	Percent
Total Bus Stops	433	100.0%
Trash

Typical Newer Trash Receptacle

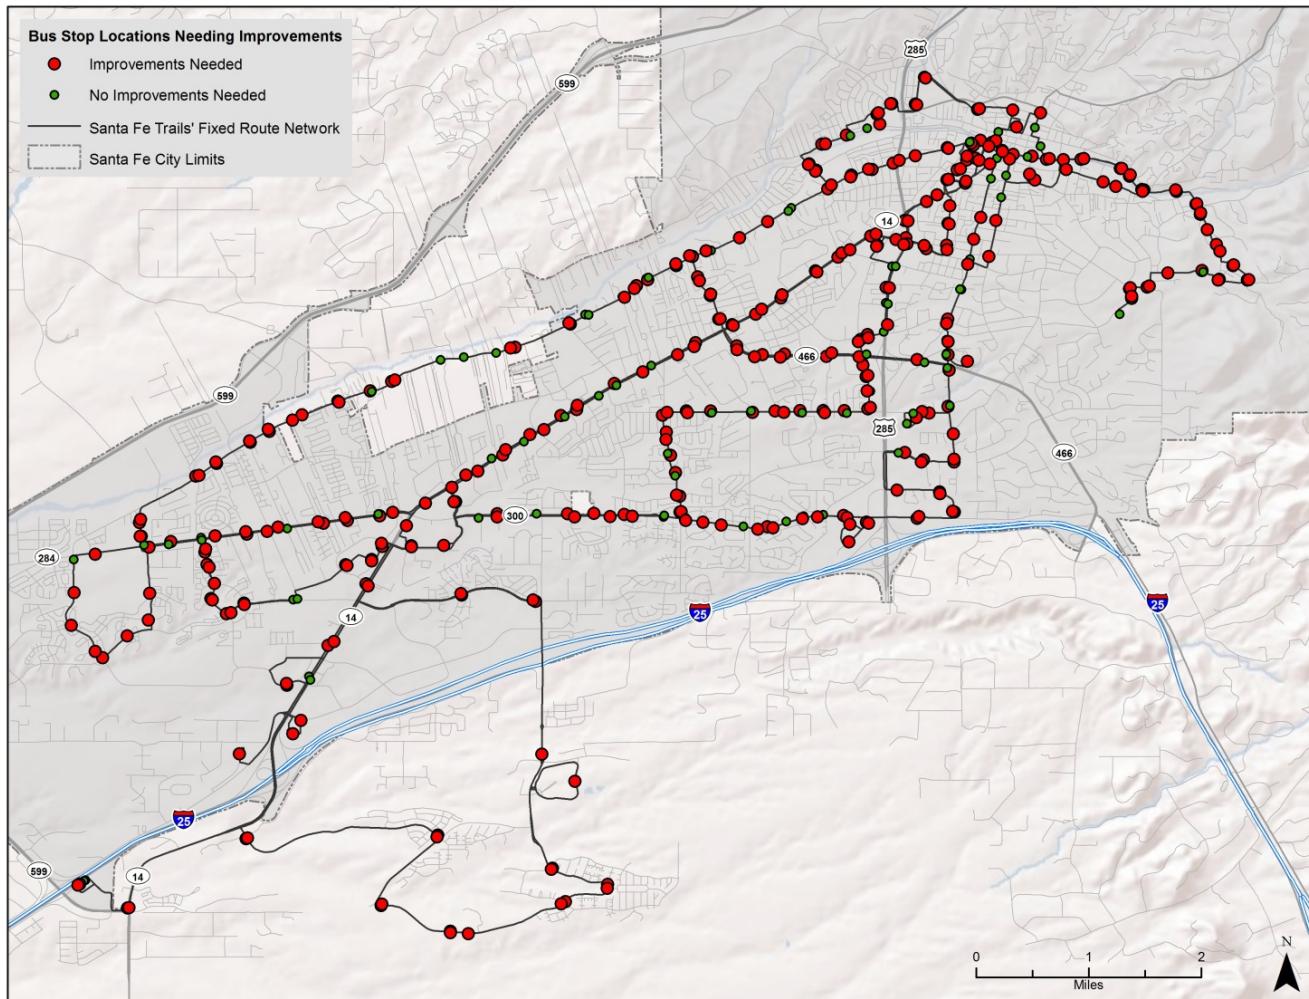

Typical Older Trash Receptacle

Bus Stop Improvements

The following provides a summary of recommendations to improve safety and accessibility at bus stop locations in Santa Fe. Specific recommendations for each of the 433 bus stop facilities are provided in a two volume set labeled Bus Stop Profiles. Of the bus stops surveyed and assessed, approximately 81% of the stops have some type of improvement recommendation. The locations of bus stops with recommended improvements are mapped in Figure 6.

Figure 6: Bus Stop Locations Needing Improvements

Sheridan Avenue Transit Center

While the Sheridan Avenue Transit Center was surveyed as part of the assessment, specific improvement recommendations were not developed.

The transit center is located on the northwest side of Sheridan Ave. between W. Marcy St. and W. Palace Ave. It serves Santa Fe Trails, NCRTD, and New Mexico DOT's Park-n-Ride with up to seven buses at the transit center at one time. Sidewalks are only on the northwest side of Sheridan Ave. adjacent to the back of a commercial building. The sidewalk is approximately seven feet wide and is currently used for the loading and unloading of passengers as well as routine pedestrian travel. A few awnings are attached to the side of the commercial building to provide shade for the benches located underneath.

Sheridan Ave. Transit Center

Santa Fe Trails is nearing the completion of a design for improvements to the Sheridan Avenue Transit Center and has received federal funding for construction of the identified improvements. Construction is currently scheduled to be completed by the summer of 2017.

Improvement Categories

The recommended bus stop improvements address four primary categories. Figure 7 outlines the four categories. A summary list of the recommended categorical improvement by stop is provided in Appendix B.

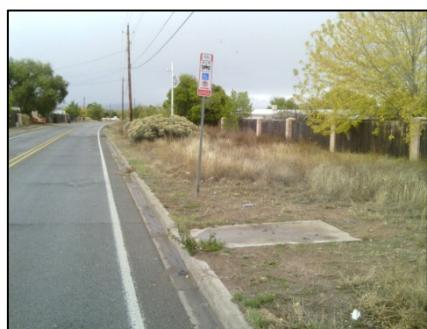

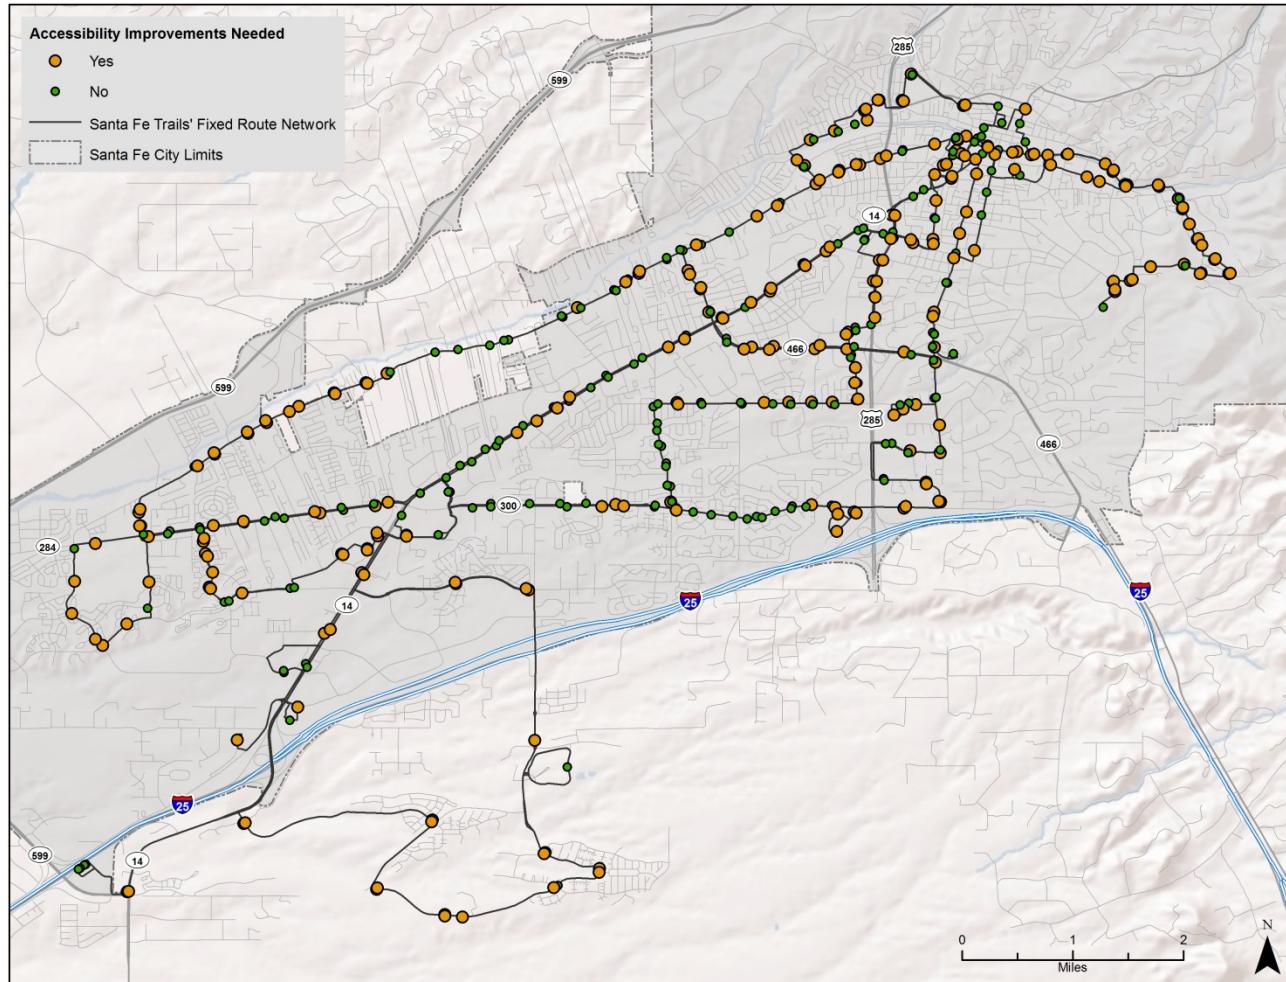

Figure 7: Improvement Categories

Accessibility/Connectivity	<ul style="list-style-type: none"> • ADA compliant landing pad • Connect to unobstructed pathway or sidewalk • Connect stop to nearest intersection
Passenger Amenities	<ul style="list-style-type: none"> • Repair or replace damaged shelters • Repair or replace damaged benches
Pole and Sign	<ul style="list-style-type: none"> • Repair or replace damaged bus stop sign • Repair or replace damaged bus stop pole • Install bus stop pole and sign
Customer Information	<ul style="list-style-type: none"> • Unobstructed access to information • Repair or replace information case/panel

Accessibility Improvements

Figure 8 provides a map of the bus stop locations in need of accessibility improvements. As can be seen from the photos below, these improvements consist of the addition of accessible sidewalks, compliant landing pads, and the removal of access obstructions.

Figure 8: Locations Needing Accessibility Improvements

No Sidewalk Connection

No Landing Pad or Sidewalk Connection

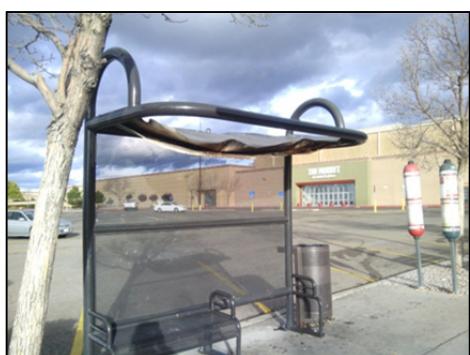

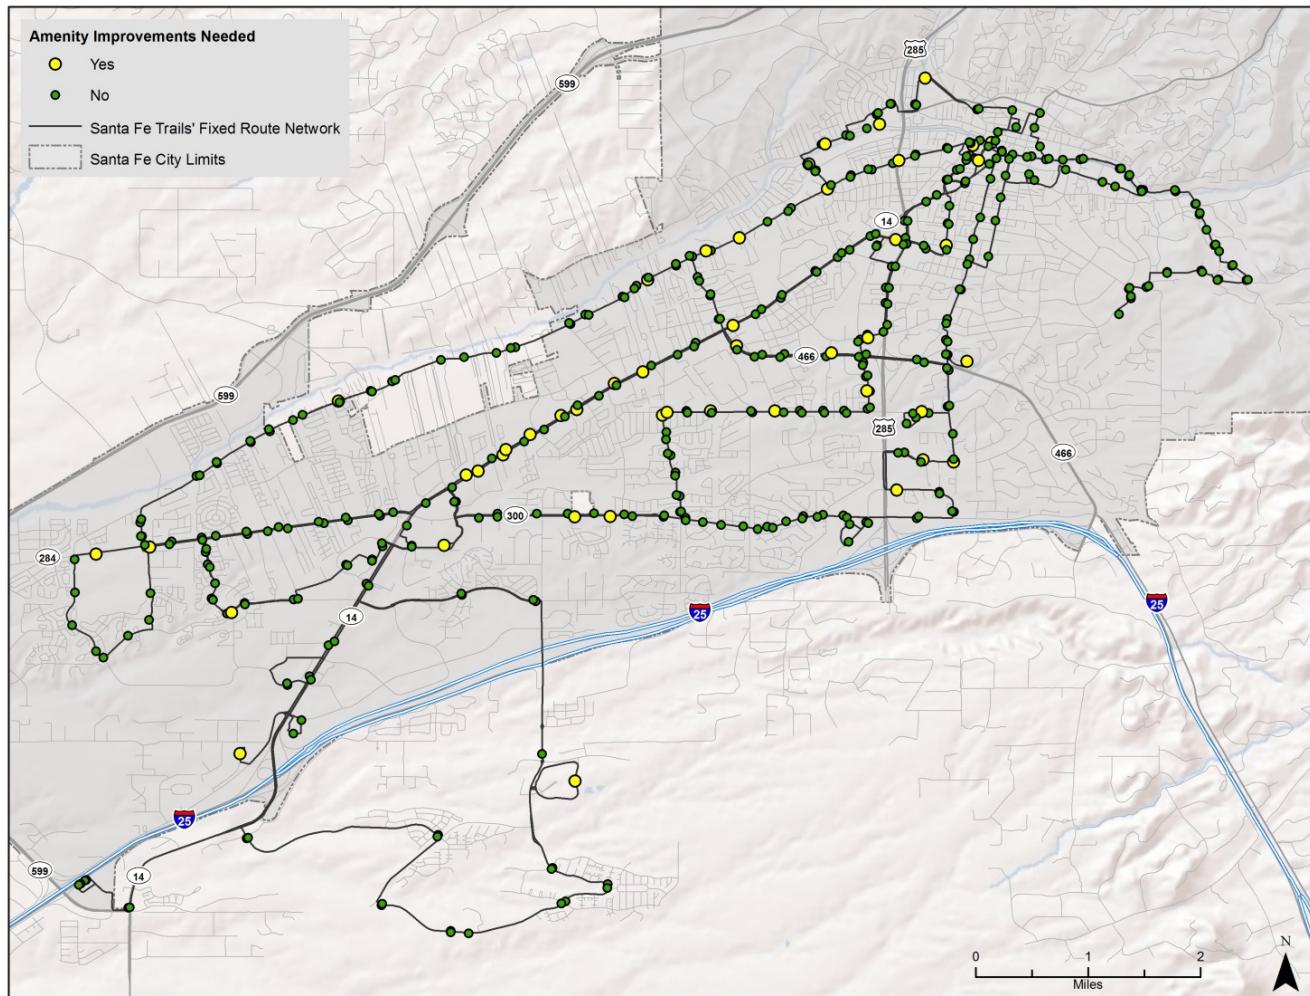

Access Obstructed by Utility Pole and Fire Hydrant

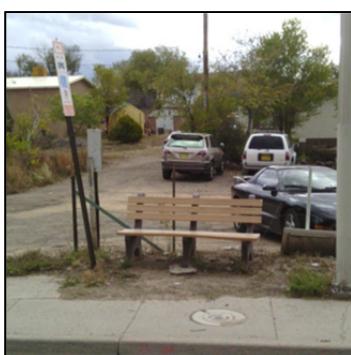

Amenity Improvements

Figure 9 provides a map of the bus stop locations in need of amenity improvements. As can be seen from the photos below, these improvements consist of the repair of existing benches and shelters.

Figure 9: Locations Needing Amenity Improvements

Damaged Shelter

Unsecured Bench

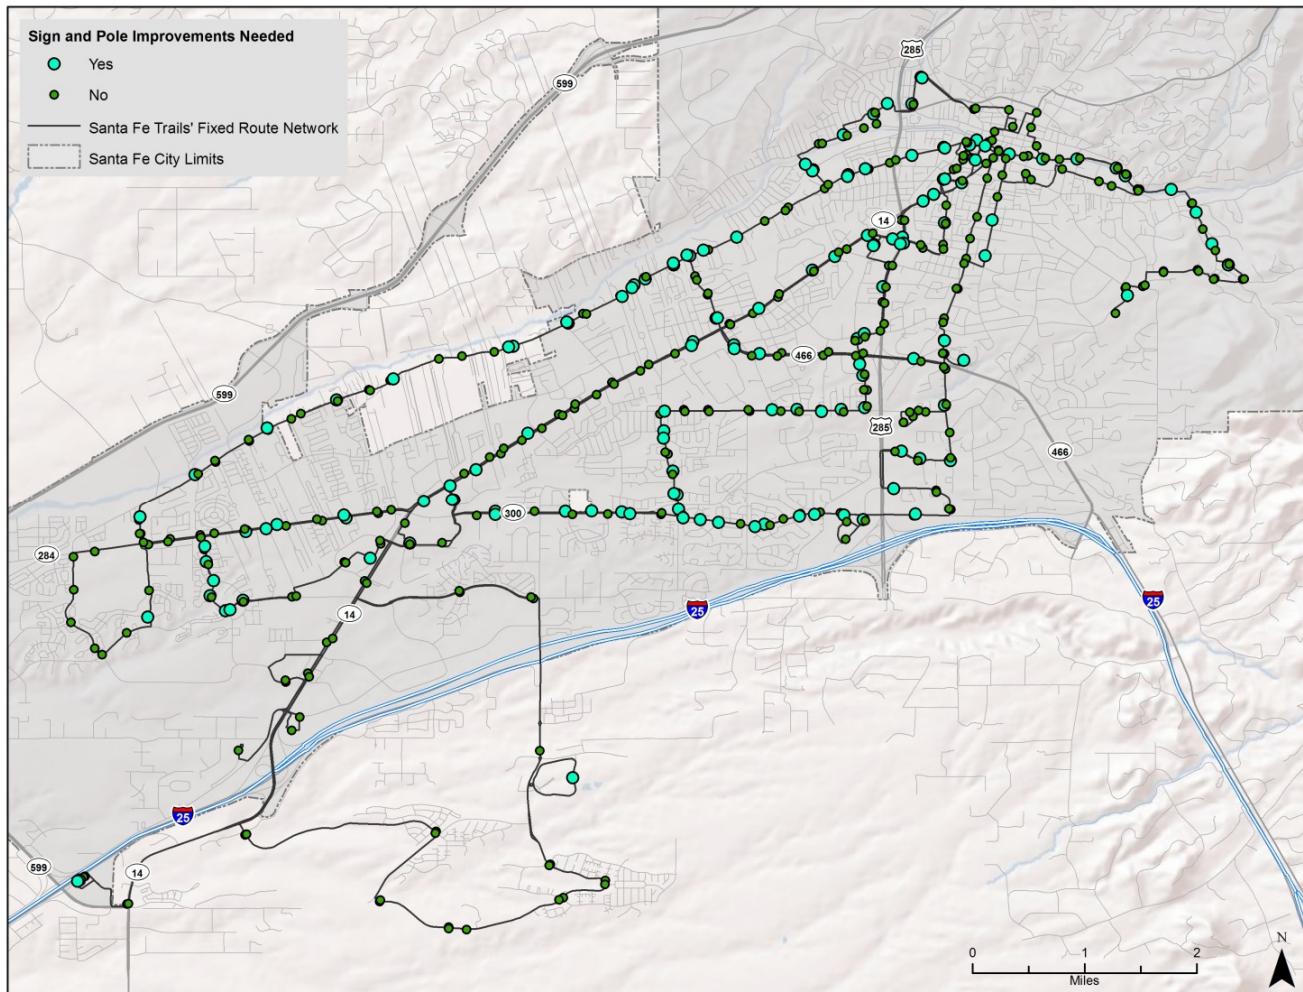

Missing Panels

Pole and Sign Improvements

Figure 10 provides a map of the bus stop locations in need of pole and sign improvements. As can be seen from the photos below, these improvements consist of adding bus stop signs to all bus stops, repairing bent and loose poles, and removing graffiti and stickers from bus stop signs.

Figure 10: Locations Needing Pole and Sign Improvements

No Bus Stop Sign

Bent Bus Stop Pole

Graffiti on Bus Stop Sign

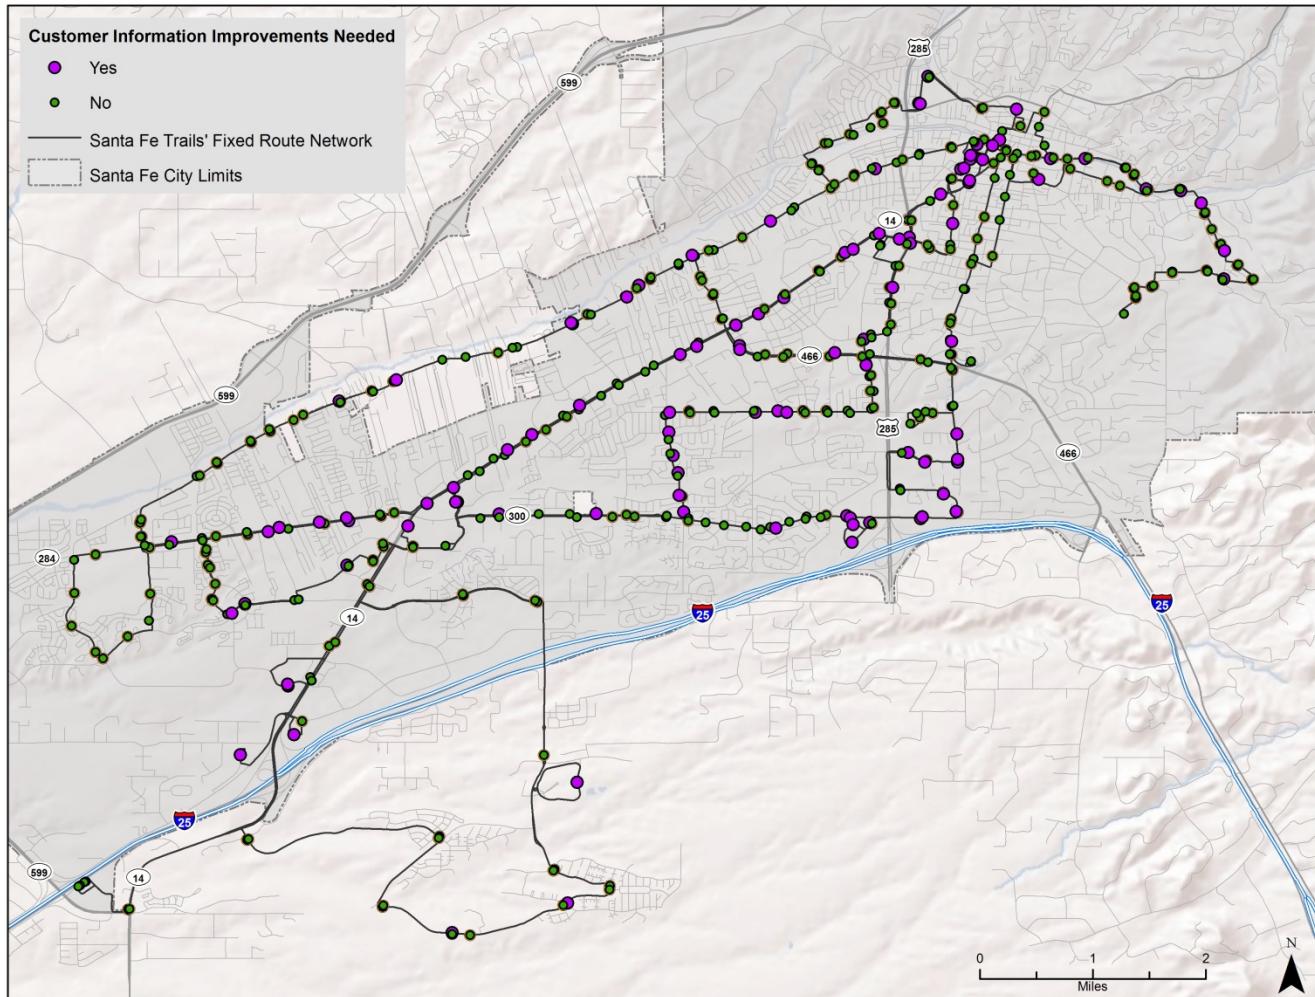

White Paint

Customer Information Improvements

Figure 11 provides a map of the bus stop locations in need of customer information improvements. As can be seen from the photos below, these improvements consist of repairing broken information cases and providing accessible pathways and areas for viewing route and schedule information.

Figure 11: Locations Needing Customer Information Improvements

Inaccessible Information

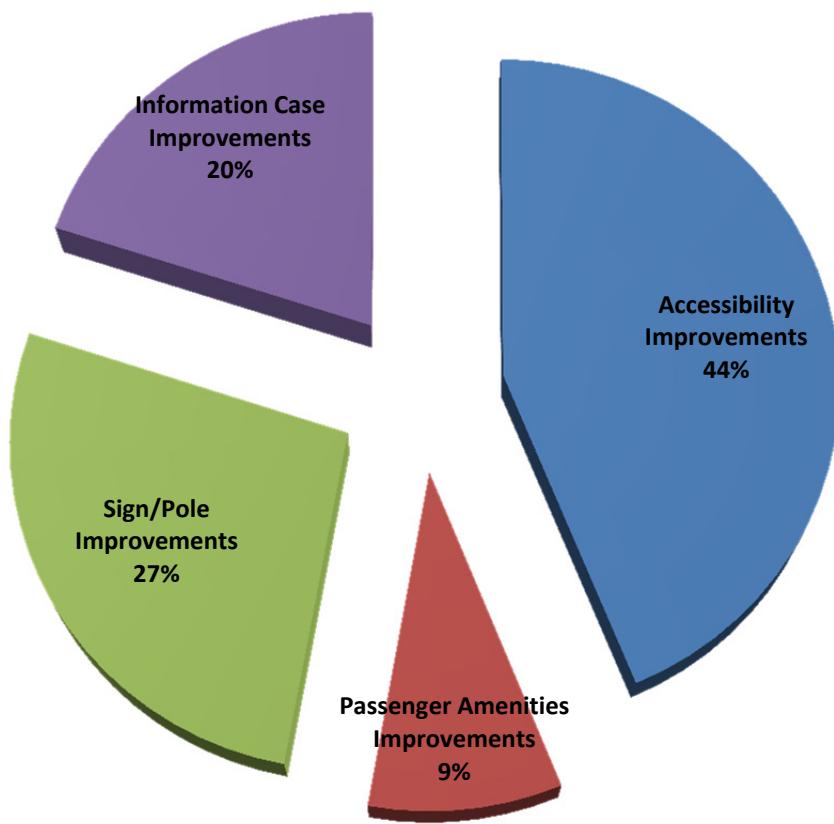

Inaccessible Information Case

Broken Information Case

The category with the majority (44%) of improvements is accessibility, following by pole and sign (27%). The category with the least amount of needed improvements is passenger amenities (9%). Figure 12 provides a breakdown of the four categories of improvements.

Figure 12: Improvement Category Breakdown

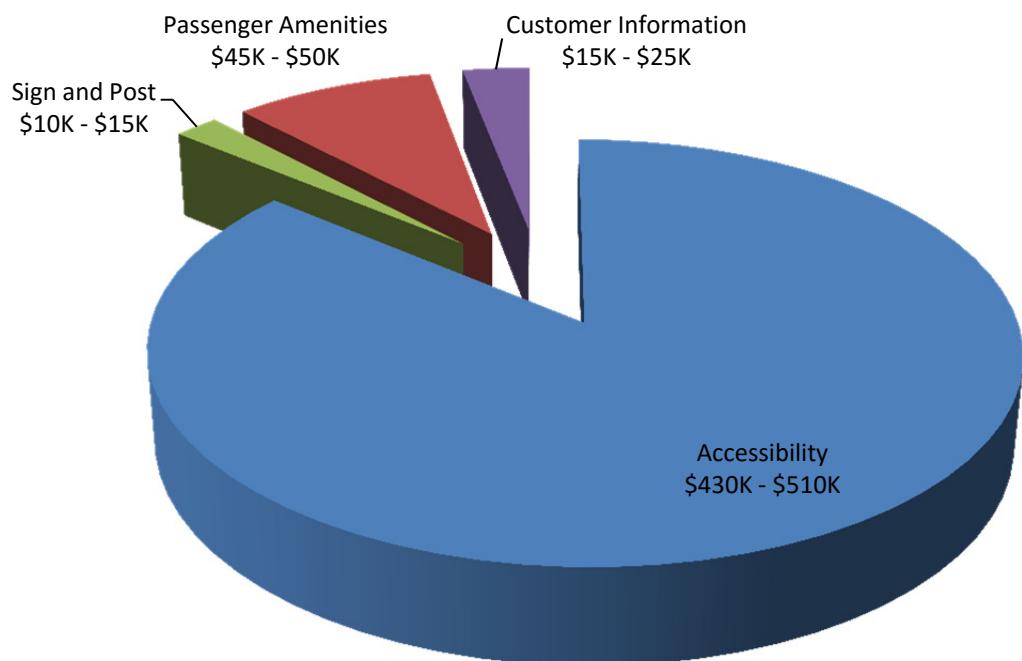

Improvement Costs

The following provides an estimate to improve all bus stops to be safer, more accessible, and ADA compliant. Costs of improvements are based on average unit costs provided by the City of Santa Fe. These costs do not include other potential factors that may impact overall costs such as permitting, drawings, engineering, traffic mitigation, and site preparation. Therefore, these are conservative estimates and are only intended for planning purposes.

Approximately 81% of the bus stops in Santa Fe are in need of some level of improvement. The total estimated costs for these improvements are between \$500,000 and \$600,000. The breakdown of the estimated cost of improvements based on the four improvement categories is provided in Figure 13. Appendix C provides the estimated cost for improvements by stop.

Figure 13: Improvement Category Cost Breakdown

Bus Stop Prioritization

The following describes the methodology used to prioritize bus stop locations for improvements. The measure of connectivity identifies any accessibility or connectivity issues and provides factors for developing a prioritization strategy; including ridership, proximity to areas of critical concern, walk score, and transit dependence index (TDI). These six factors were weighted as shown in Table 7 to create a prioritization measure.

The scoring allows for a range of 4 to 40 with a perfect score of 4 and a worst-case score of 38. Once the analysis was conducted the best bus stop score was 4 while the worst was 38.

The following six pages contain brief descriptions of each element with associated breakout maps which showcase the results from each prioritization element. The maps are followed by an overview summary and final results map.

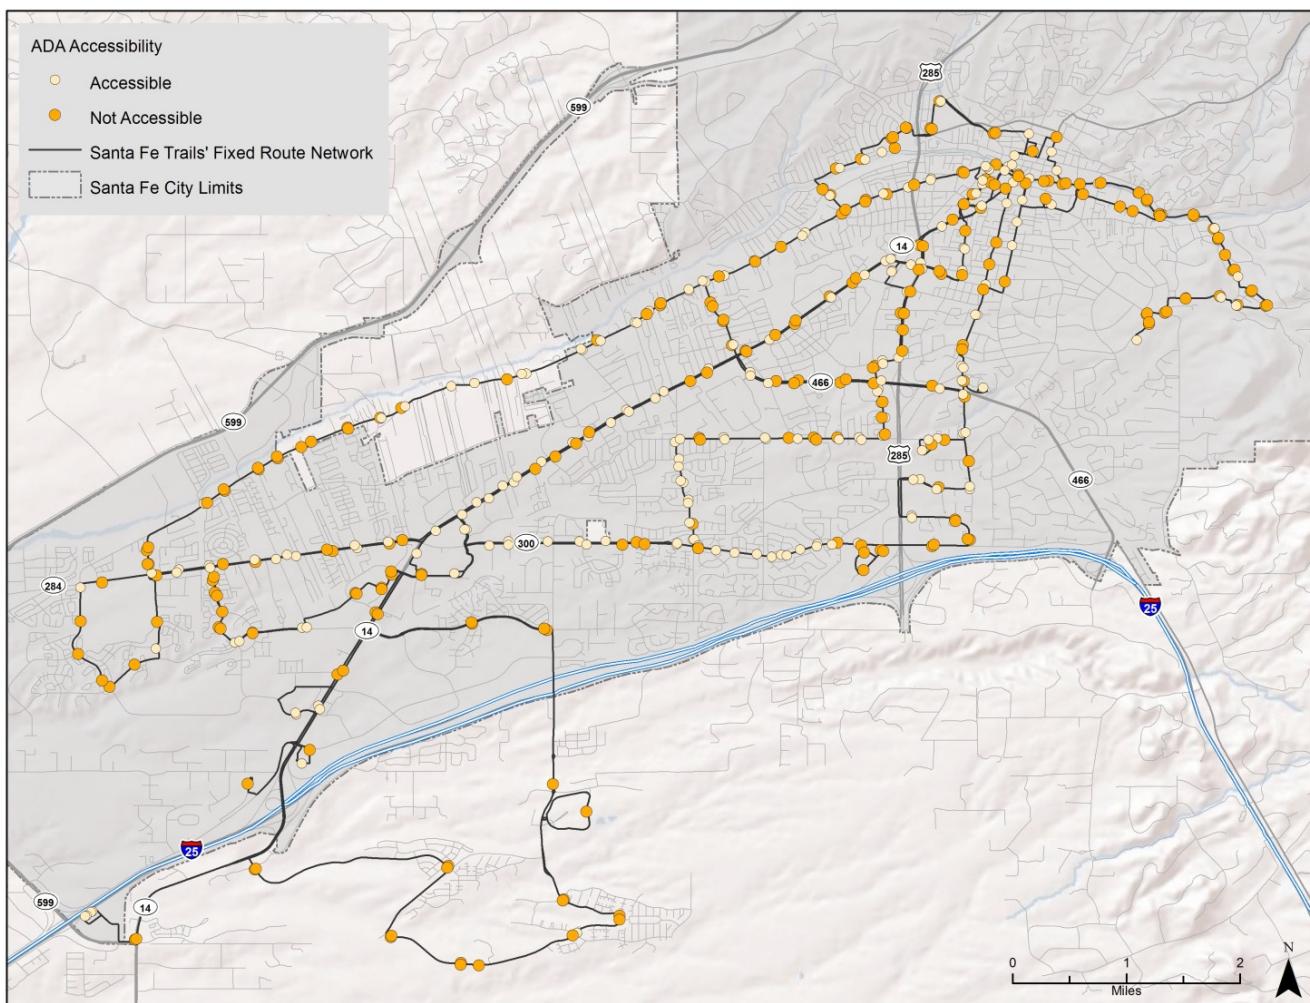

Table 7: Connectivity Measure Scoring Levels

Element	Scoring
ADA Accessibility	Accessible = 0 Not Accessible = 10
Sidewalk Connectivity	Good = 0 Fair = 6 Poor = 10
Ridership	0 – 8 Daily Passengers = 1 9 – 26 Daily Passengers = 2 27 – 60 Daily Passengers = 3 61 – 118 Daily Passengers = 4 119+ Daily Passengers = 5
Area of Critical Concern	No = 1 Yes = 5
WalkScore	0 – 20 = 1 21 – 40 = 2 41 – 60 = 3 61 – 80 = 4 81 – 100 = 5
Transit Dependence Index	Low = 1 Elevated = 2 Moderate = 3 High = 4 Very High = 5

ADA Accessibility

ADA Accessibility was determined by relating stops that had a compliant landing pad that is connected to a pathway or sidewalk. In addition, passenger shelters and customer information such as route and schedule information must not be obstructed and be accessible for persons in a wheelchair. A total of 199 of the bus stops (46%) meet these criteria. Stops with no ADA landing pad and/or sidewalk connection create an unsafe and inaccessible bus stop for ambulatory riders and riders with mobility devices. Figure 14 illustrate the location of accessible and non-accessible bus stops.

Figure 14: ADA Accessibility by Stop Location

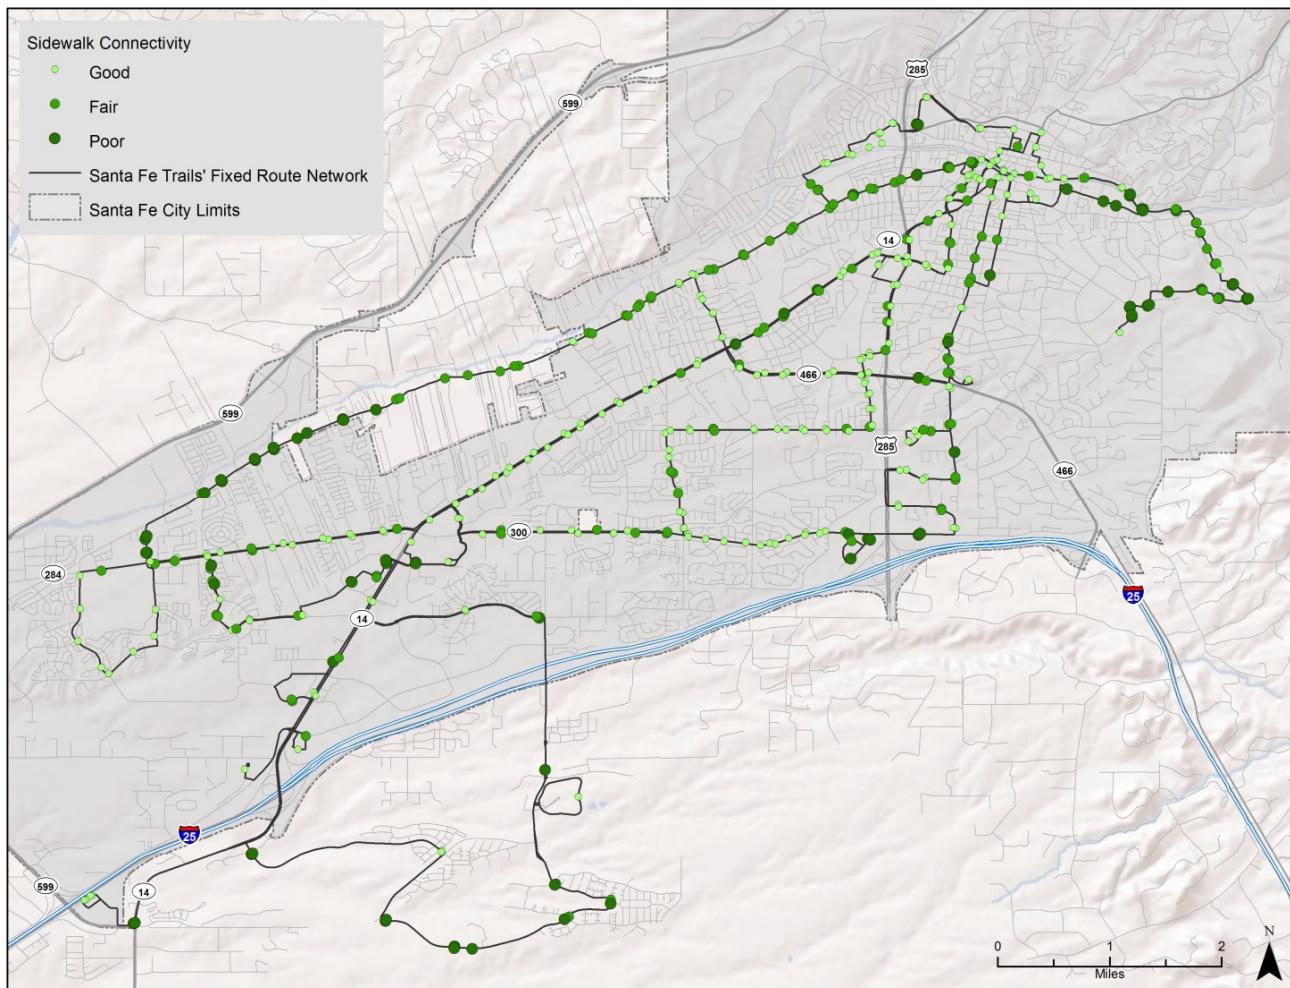

Sidewalk Connectivity

The results from the sidewalk connectivity analysis are shown in Figure 15. This measure identified if there were any connectivity issues between the bus stops and surrounding major trip generators. This was completed through a cursory visual observation during the bus stop assessments. To ensure consistency the following designations were developed prior to the assessment:

- **Good:** sidewalks are present along the on-street and cross-street where there are trip generators and/or paired bus stops.
- **Fair:** sidewalks are present along the on-street where there are trip generators and/or paired bus stops but not along the cross-street where there are trip generators and/or bus stops.
- **Poor:** no sidewalk is present at the bus stop location or on the other side of the street where there is a paired stop or trip generator.

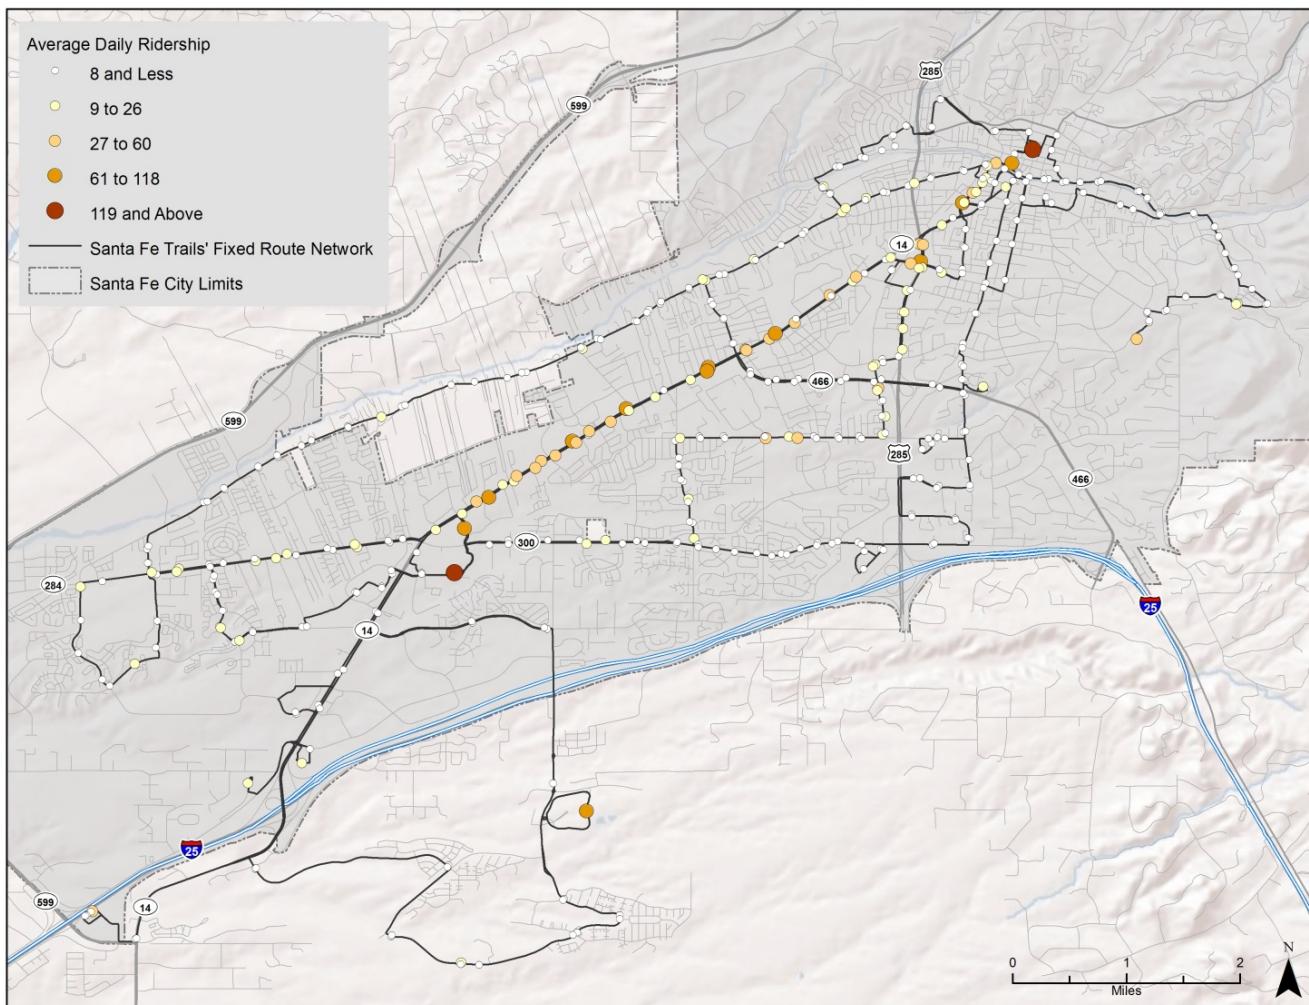

Figure 15: Sidewalk Connectivity around Stop Locations

Average Ridership

Average ridership was determined through a single year of sample ride checks that had been performed by Santa Fe Trails for the purposes for NTD reporting. The level of activity is one of the single most important factors when prioritizing for stops for improvements particularly with constrained funding. Targeting locations where there is a high level of ridership activity ensures that improvements will have a greater positive impact on the number of riders. Figure 16 showcases the average daily ridership throughout the system.

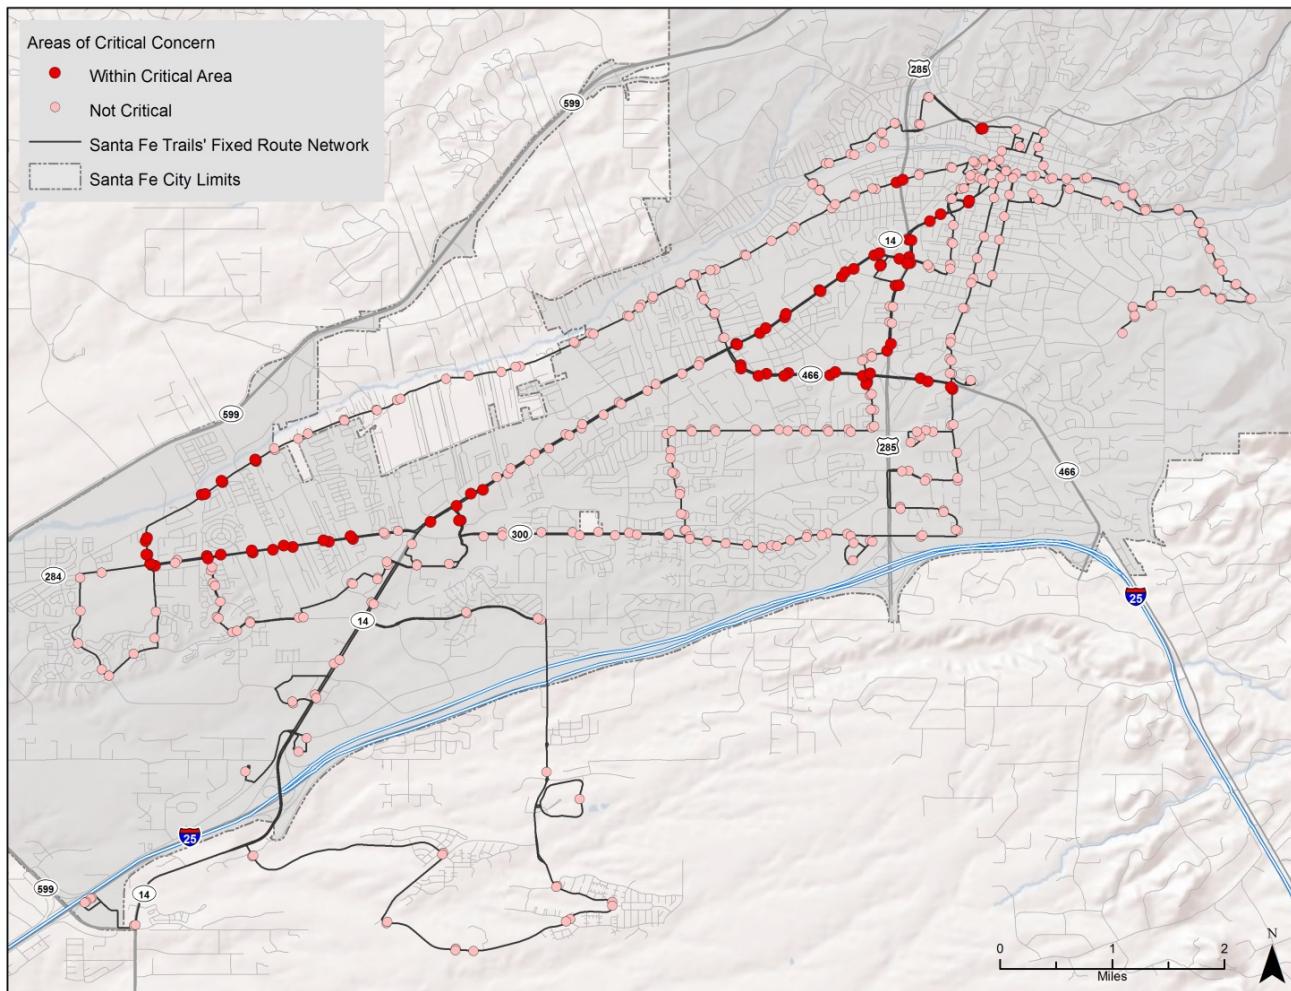

Figure 16: Average Daily Ridership by Stop Location

Areas of Critical Concern

There are ten areas of critical concern in Santa Fe as identified in the 2015 Metropolitan Pedestrian Master Plan. These ten areas of critical concern were identified by the SFMPO through an analysis of existing conditions, input from the city's Pedestrian Working Group and the general public. The areas of critical concern are areas with the highest concentration of high pedestrian demand potential and low walkability¹. There are 79 stops that are currently within an area of critical concern.

Figure 17: Stop Locations Within Areas of Critical Concern

¹ SFMPO Pedestrian Master Plan, 2015

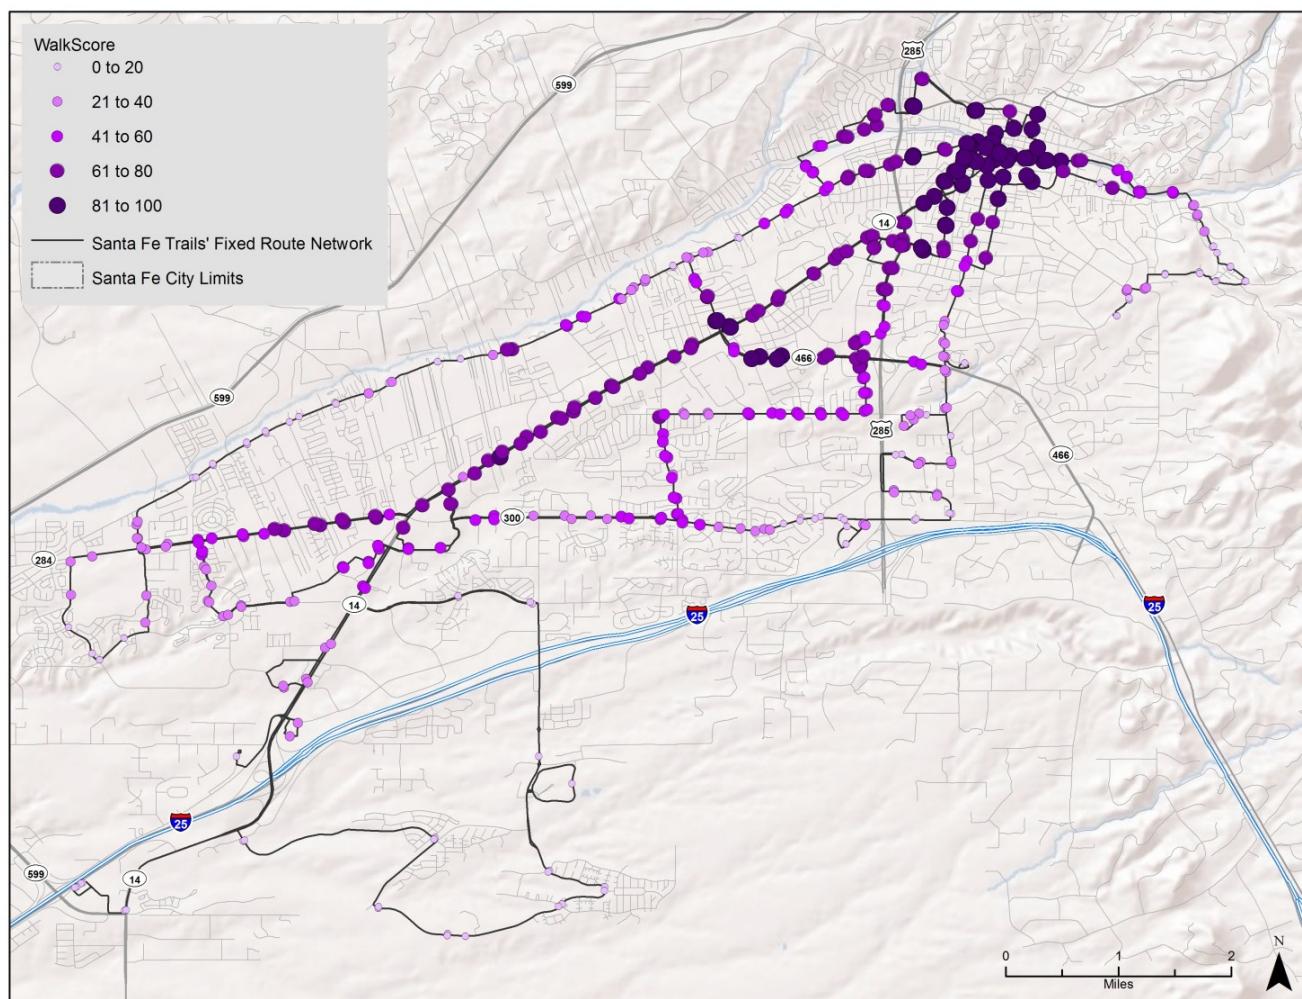

Walk Score

Each bus stop was assigned a walk score based on the website www.walkscore.com. The walk score measures the walkability of any address or location. Points are awarded based on the distance to amenities in each category. The score also measures pedestrian friendliness by analyzing population density and road metrics such as block length and intersection density². Figure 18 provides the results of the WalkScore analysis.

Walk Score Breakdown

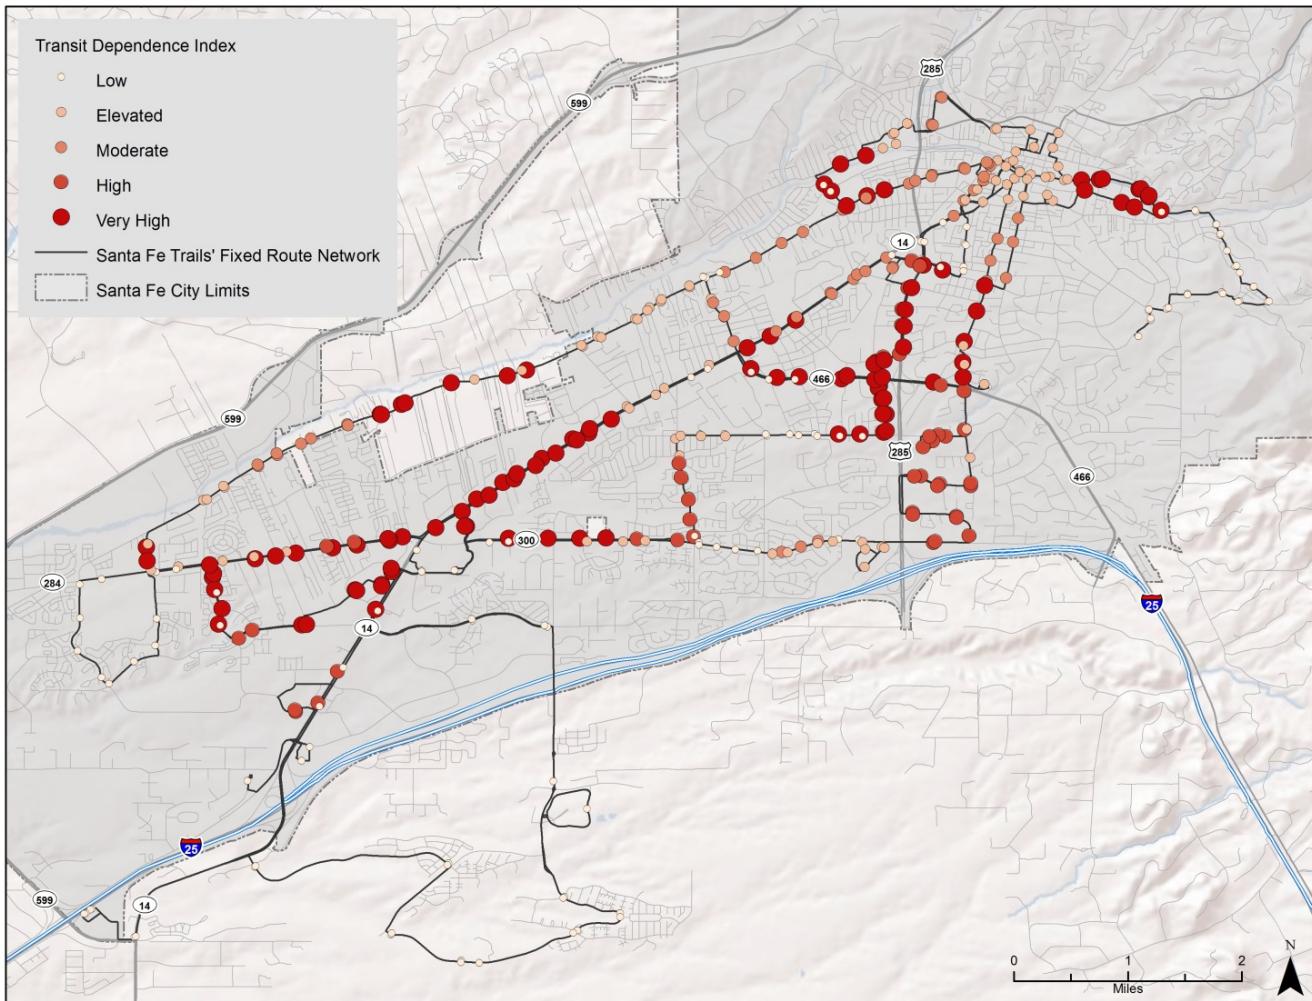

Figure 18: WalkScore by Stop Location

Transit Dependence Index

A transit dependence index (TDI) was developed to identify high concentrations of population segments that are likely to use transit. The population segments that are included in the TDI are the elderly, youth, low income, disabled, and autoless households. This factor combined with ridership will help to identify areas where improvements would have the greatest impact on improving access to transit.

Figure 19: Transit Dependence Index by Stop Location

Overall Results

As seen in the graph below, the final results were varied with an average score of 17.67. The graph shows the delineation, around scores 24 and 25, where the bus stops with poor access and connectivity begin; the minimum score for a non-accessible and poor connectivity stop is 24. Figure 20 provides a scoring breakdown for the top bus stops and Figure 21 provides a map of the overall results; for this formula, a cut-off of 30 was used to determine the top tier of bus stops in need of improvements.

Figure 20: Bus Stop Prioritization Scoring Trend

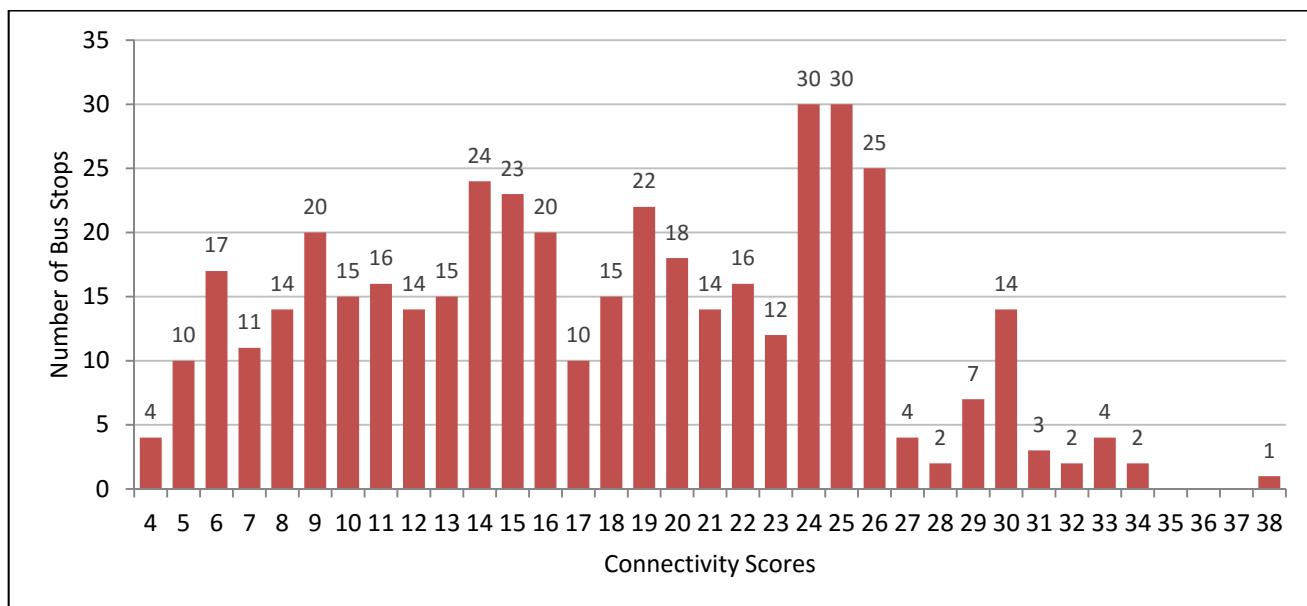

Table 8 provides a listing of the top 26 bus stops which received a prioritization score of 30 or higher. As seen from the table, the Cerrillos Road corridor between St. Michaels Drive and the Santa Fe Indian School is perhaps the area with the greatest need for future improvements. Other areas with high priority bus stops include:

- Southern and northern ends of Agua Fria.
- Camino Entrada.
- Canyon Road.
- E. Alameda Street.
- San Felipe Road between Agua Fria and Airport Road.

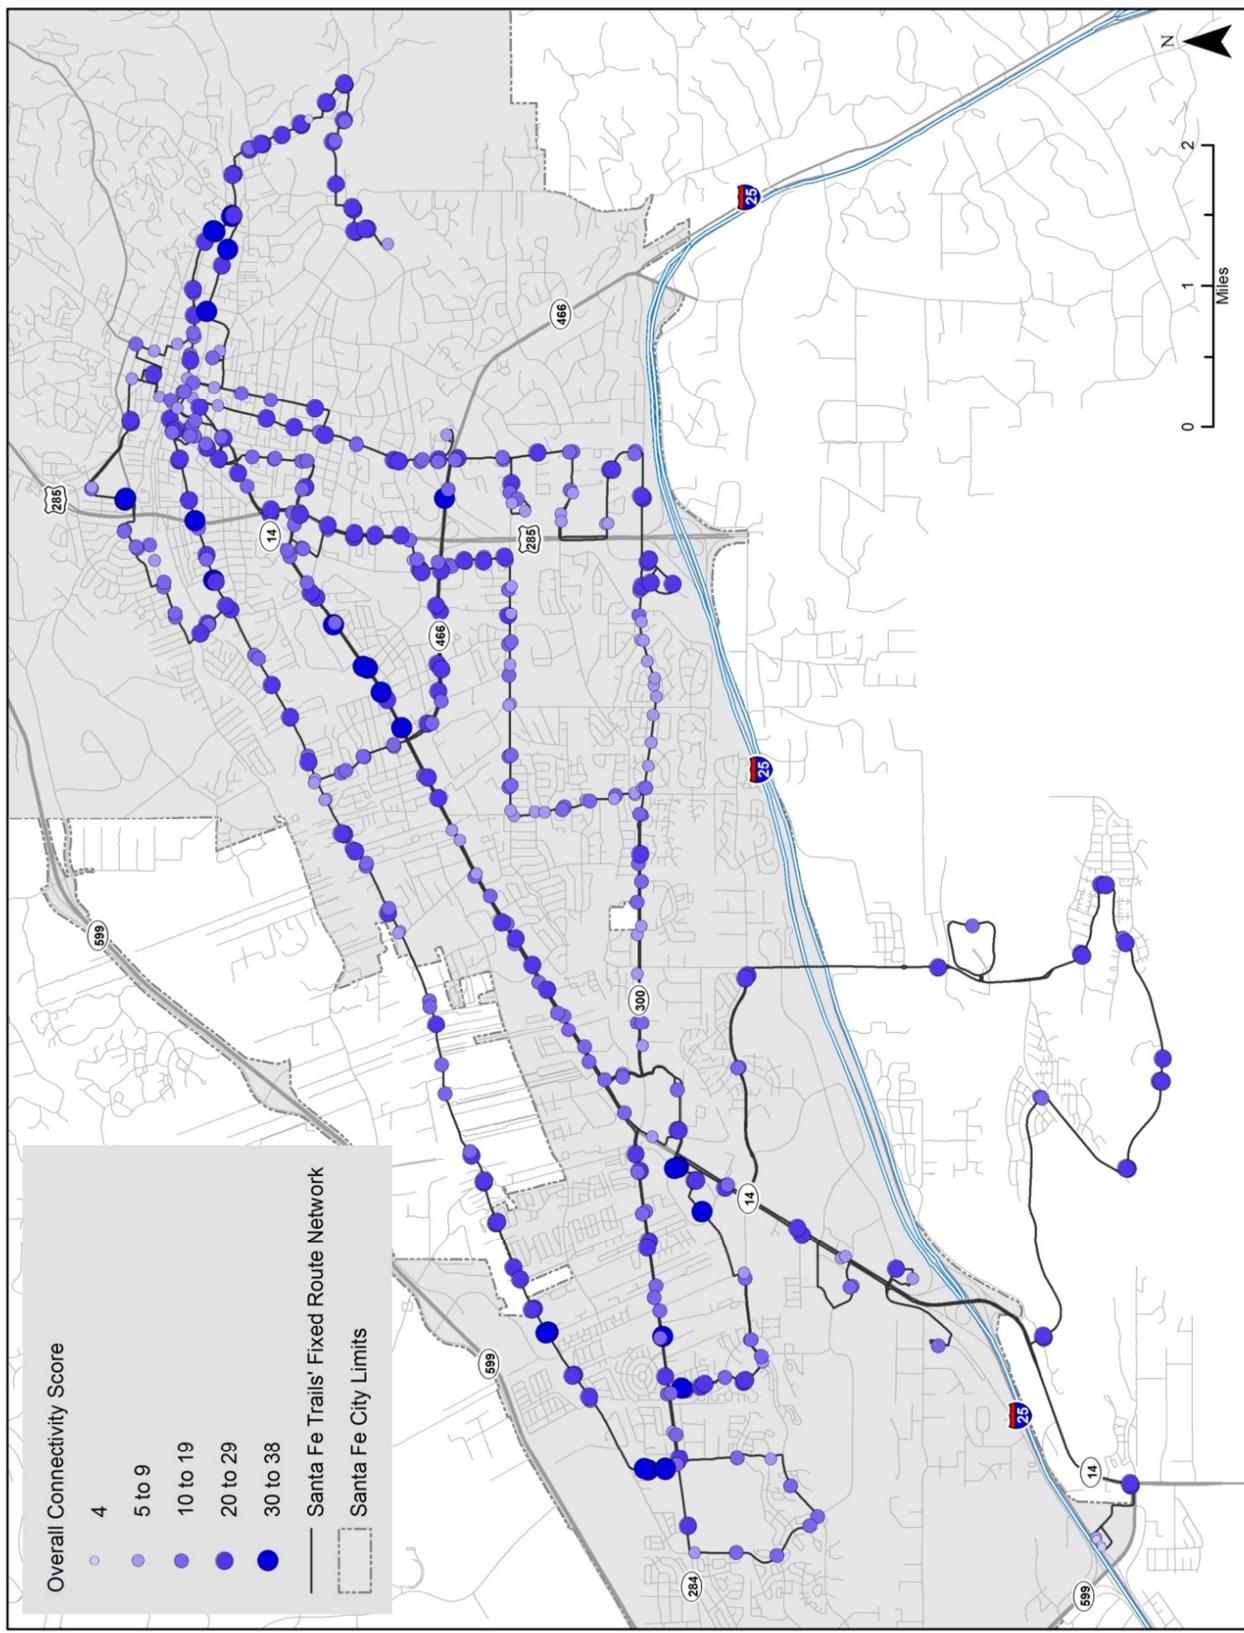

The estimated cost of improving each of the 26 high priority bus stops is approximately \$93,000. The majority of that cost would be for laying new sidewalks or moving large costly obstructions. However, some of the high priority stops could be pulled into ADA compliance for less than \$1,000. Take for example the bus stop at Airport Road and Fields Lane only requires the removal of a portion of the shelter's bench which is estimated to cost \$150.

Table 8: High Priority Bus Stops for Future Improvements

Figure 21: Overall Connectivity Score Results

APPENDIX A

DATA DICTIONARY

ANNOTATED DATA DICTIONARY

Longitude - Double - Assigned by DB administrator

Latitude - Double - Assigned by DB Administrator

StopID

A unique value that is assigned to each bus stop. This value is provided by Santa Fe Transit.

OnStreet

OnStreet should be in all caps and is the name of the street the bus is stopped on when serving the stop.

Cross Street

Cross Street should be in all caps and is the closest cross street. It may, on occasion, be an address, business name or a descriptor, such as "EAST END OF RAIL OVERPASS" or "WALMART".

Heading

Heading is the direction a bus would be facing when stopped at the bus stop (360=North, 90=East, 180=South, 270=West). Expressed in decimal degrees. Range: 0-360.

Placement

Identify the location of the bus stop relative to the intersection.

Valid designations are:

1. NS - Nearside
2. FS - Farside
3. MB - Mid-block
4. AF - Across From
5. AT – At Location

Status

Describe the current status of the bus stop.

Valid designations are:

- Active
- Inactive
- Under construction
- Restricted Access
- Not Found
- New

Adjacent Land Use

Identify the types of land use that is adjacent to the bus stop.

Valid designations are:

- | | |
|--|---|
| <ul style="list-style-type: none">• Residential – Single Family• Residential – Multi Family• Commercial – Retail• Commercial – Office• Industrial• Vertical Mixed Use• Park – Open Space• Vacant Lot• Education – School | <ul style="list-style-type: none">• Education – College• Medical• Cultural• Recreation Center• Place of Religion• Government Office• Human Service• Transit Center |
|--|---|

Speed Limit

Identify the posted speed limit for the roadway adjacent to the bus stop.

Valid designations are:

- | | |
|---|--|
| <ul style="list-style-type: none">• 10 mph• 25 mph• 30 mph• 35 mph• 40 mph• 45 mph | <ul style="list-style-type: none">• 50 mph• 55 mph• 60 mph• 65 mph• Not Applicable |
|---|--|

Travel Lanes

Identify the number of travel lanes along the roadway adjacent to the bus stop.

Valid designations are:

- 1
- 2
- 3
- 4
- 5
- 6
- 7
- 8
- 9
- 10
- Not Applicable

Median

Identify if there is a raised median or pedestrian refuge island across the on-street.

Valid designations are:

- Yes
- No

Bus Stop Poles

Identify the number of bus stop poles at the stop location. Do not include utility poles, traffic sign poles, traffic light poles, etc.

Valid designations:

- 0
- 1
- 2
- 3

Pole Installation

Identify how the bus stop pole is installed.

Valid designations are:

- Earth
- Concrete
- Brick
- Stone
- Asphalt
- Out of Ground

Pole Damage

Identify if there is any physical damage to the bus stop pole.

Valid designations are:

- None
- Rust
- Bent
- Severed
- Graffiti
- Loose
- Leaning
- Other

Pole Comments

Freeform notes field to capture any miscellaneous comments about the poles.

Bus Stop Sign

Identify the number of a head signs at the stop.

Valid designations are:

- 0
- 1
- 2
- 3

Sign Installation

Identify how the bus stop sign is installed at the bus stop.

Valid designations are:

- Bus Stop pole
- Traffic sign pole
- Utility pole
- Light pole
- Shelter
- Building
- Traffic light pole
- Other

Sign Height

Identify if the distance from the bottom of the sign to the ground is greater or less than 80 inches.

Valid designations are:

- Less than 80"
- 80" or greater

Route Information

Document the route information that is posted on the bus stop sign. Separate route numbers with a comma. Leave blank if there is not route information on the bus stop sign. Free form text.

Phone Number on Sign

Identify if there is a phone number on the bus stop sign.

Valid designations are:

- Yes
- No

RouteMatch ID

Identify if there is a RouteMatch ID on the bus stop sign.

Valid designations are:

- Yes
- No

QR Code

Identify if there is a QR Code on the bus stop sign.

Valid designations are:

- Yes
- No

Sign Damage Type1, Sign Damage Type2

Identify if there is physical damage to the bus stop sign.

Valid designations are:

- None
- Loose
- Graffiti
- Stickers
- Torn
- Missing Letters
- Other

Sign Comments

Freeform notes field to capture any miscellaneous comments about the signs.

Information Case

Identify the type of information case at the bus stop.

Valid designations are:

- None
- Bullet
- Rectangular 4 sided
- Flat double sided
- Flat single sided

Information Case Accessible

Identify if the information case is accessible meaning there is a paved unobstructed 36" area around the information case.

Valid designations are:

- Accessible
- Obstructed
- Unpaved

Information Case Damage

Identify if there is any physical damage to the information case.

Valid designations are:

- None
- Loose
- Graffiti
- Stickers
- Broken

Digital Display

Identify if there is a digital display at the bus stop.

Valid designations are:

- Yes
- No

Route Schedule

Identify if there is a schedule of the route available at the bus stop.

Valid designations are:

- Yes
- No

Route Map

Identify if there is a map of the route available at the bus stop.

Valid designations are:

- Yes
- No

System Map

Identify if there is a map of the system map available at the bus stop.

Valid designations are:

- Yes
- No

Shelter Count

Identify the number of shelters at bus stop.

Choice variable is 0-5.

Type of Shelter(s)

Identify the type of shelter(s) are at the bus stop.

Valid designations are:

- | | | |
|---|---|--|
| <ul style="list-style-type: none">• Type A• Type B• Type C• Type D | <ul style="list-style-type: none">• Type E• Type F• Type H1• Type H2 | <ul style="list-style-type: none">• Type H3• Type H4• Custom |
|---|---|--|

Shelter Foundation

Identify the type of surface the shelter is mounted on.

Valid designations are:

- | | |
|---|---|
| <ul style="list-style-type: none">• Concrete• Brick• Dirt | <ul style="list-style-type: none">• Stone• Grass• Other |
|---|---|

Shelter Advertisement

Identify if there is advertisement on the shelter.

Valid designations are:

- Yes
- No

Shelter Damage

Identify any physical damage to the shelter.

Valid designations are:

- | | |
|--|---|
| <ul style="list-style-type: none">• None• Loose• Panel• Graffiti• Rust | <ul style="list-style-type: none">• Roof• Light• Stickers• Other |
|--|---|

Shelter Access

Identify if there is unobstructed access to the entrance of the shelter.

Valid designations are:

- Yes
- No

Shelter Entrance

Is there at an opening at the front of the shelter that is at least 36" wide and obstructed?

Valid designations are:

- Yes
- No

Shelter Interior

Identify if there is an unobstructed space completely under the shelter that is at least 30" wide by 48" deep.

Valid designations are:

- Yes
- No

Shelter Comments

Freeform text field to capture any miscellaneous information about shelters.

Bench

Identify the number of benches at the bus stop.

Choice variable is 0-10.

Bench Location

Identify the location of the bench(es).

Valid designations are:

- Shelter
- Freestanding
- Shelter and Freestanding

Bench Advertisement

Identify if there is any advertisement on the bench.

Valid designations are:

- Yes
- No

Bench Damage

Identify any physical damage to the bench.

Valid designations are:

- None
- Broken Pieces
- Graffiti
- Poor Installation
- Other

Bench Comments

Freeform text field to capture any miscellaneous information about the benches.

Sidewalk Width

Document the width of the sidewalk in inches. If no sidewalk is present enter “None”. Free from text field.

Sidewalk Landscape Buffer

Identify if there is a presence of landscaping/grassy area between the sidewalk and the curb.

Valid designations are:

- Yes
- No

Sidewalk Obstruction

Identify if there is an object along the sidewalk between the bus stop and the nearest intersection that reduces the sidewalk width to less than 36”.

Valid designations are:

- None
- Vendor Publication Box
- Utility Pole
- Shelter
- Bench
- Trash Can
- Landscaping
- Fence
- Wall
- Mailbox
- Street Sign Pole
- Bus Stop Pole
- Other

Sidewalk Surface Problem

Identify if there is an impediment that could make travel along the sidewalk difficult and/or unsafe.

Valid designations are:

- None
- Major cracks
- Uneven pavement
- Vegetation
- Slope
- Sink hole
- Other

Sidewalk Connectivity

Identify if there are connectivity issues to major trip generators from the bus stop based on the presence of sidewalks along the onstreet and cross street. This is a cursory visual observation.

Valid designations are:

- Good – Sidewalks are present along the onstreet and cross street where there are trip generators and/or bus stops.
- Fair – Sidewalks are present along the onstreet where there are trip generators and/or bus stops but not along the cross street where there are trip generators and/or bus stops.
- Poor – No sidewalk is present at the bus stop location or on the other side of the street where there is a paired stop or trip generators.

Landing Pad

Identify if there is a presence of a 5'x8' non-dirt paved ADA landing pad at the bus stop.

Valid designations are:

- None
- Yes, unobstructed
- Yes, obstructed
- No, <5'x8'
- No, Sidewalk

Landing Pad Material

Identify the surface material of the landing pad.

Valid designations are:

- Concrete
- Asphalt
- Brick Pavers
- Other

Landing Pad Surface Problem

Identify if the landing pad have problems that could impede its use by pedestrians or persons with a mobility device.

Valid designations are:

- None
- Major cracks
- Uneven pavement
- Vegetation
- Slope
- Catch basin
- Other

Landing Pad Obstruction

Identify if there is a potential obstruction on the landing pad area that would make it less than 5'x8'.

Valid designations are:

- | | |
|--|---|
| <ul style="list-style-type: none">• None• Vendor Box• Trash Can• Shelter• Utility Pole• Bus Stop Pole | <ul style="list-style-type: none">• Traffic Sign Pole• USPS Mailbox• Fence• Wall• Other |
|--|---|

Landing Pad Connect to Sidewalk

Identify if the landing pad is connected by a sidewalk.

Valid designations are:

- Yes
- No
- Not Applicable (there's a pad but no sidewalk)

Landing Pad Connect To Curb

Identify if the landing pad connects to the on-street curb.

Valid designations are:

- Yes
- No
- Not Applicable (no curb)

Landing Pad Comments

Freeform comments field to capture any miscellaneous information about the landing pad.

Curb Ramp Type

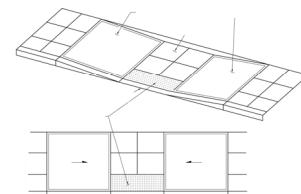

Identify the type of curb ramp that is closest to the bus stop.

Valid designations are:

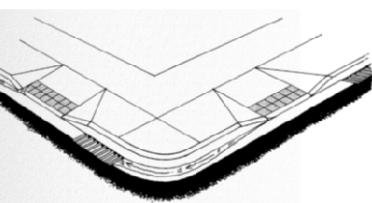

- None
- Perpendicular
- Diagonal
- Parallel

Parallel

Perpendicular

Diagonal

Detectable Warning

Identify if there is a detectable warning surface on the curb ramp closest to the bus stop.

Valid designations are:

- Yes
- No

Curb Ramps

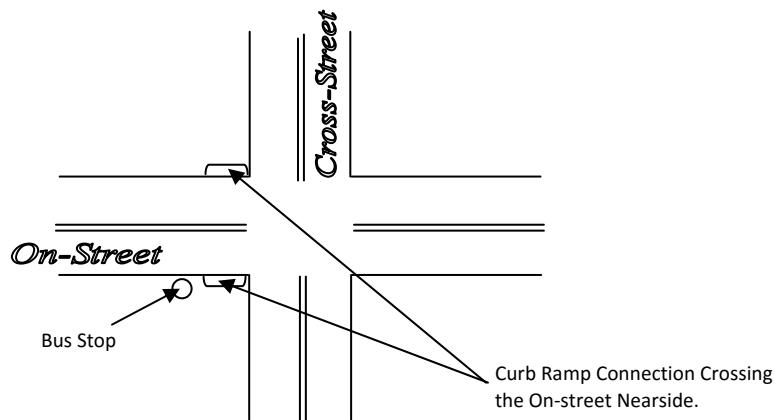

The following four fields are designed to determine if there are connecting curb ramp pairs at the stop in the location specified – On-street/Nearside, On-street/Farside, At-street/At Stop, or At Street/Opposite Side.

Curb Ramp Connection OSNS

Curb ramp connection at the on-street nearside intersection crossing location.

Valid designations are:

- Yes
- No

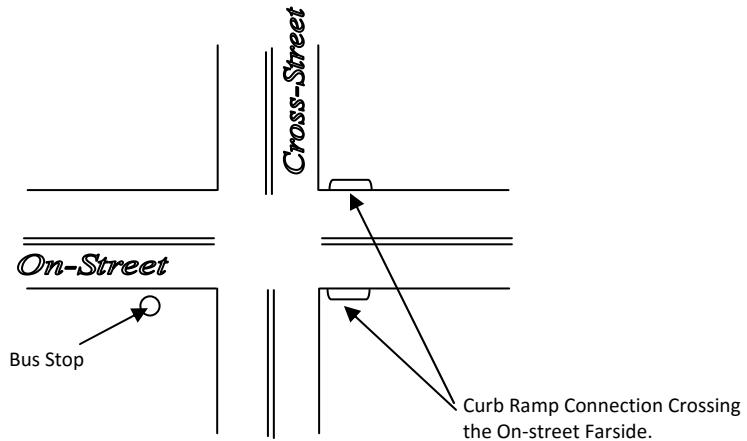

Curb Ramp Connection OSFS

Curb ramp connection at the on-street farside intersection crossing location.

Valid designations are:

- Yes
- No
- N/A

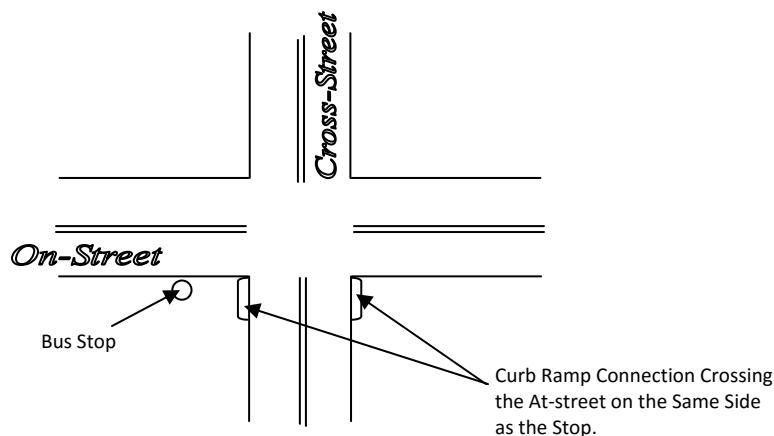

Curb Ramp Connection CSAS

Curb ramp connection for the cross-street on the side of the onstreet where the bus stop is located.

Valid designations are:

- Yes
- No
- N/A

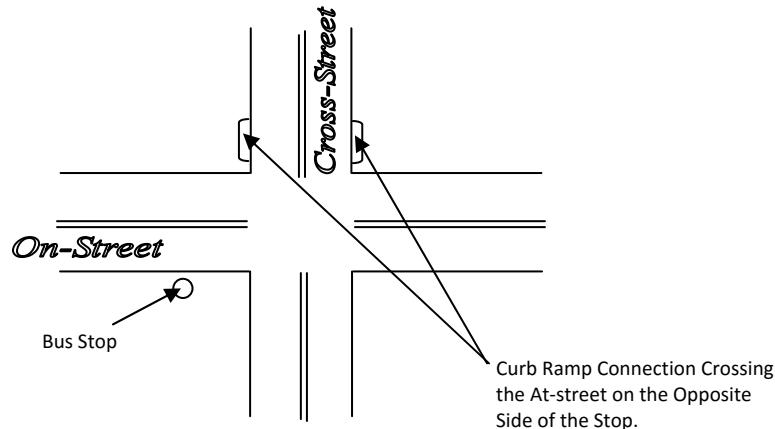

Curb Ramp Connection CSOP

Curb ramp connection for the cross-street on the opposite side of the onstreet where the bus stop is located.

Valid designations are:

- Yes
- No
- N/A

Crosswalks

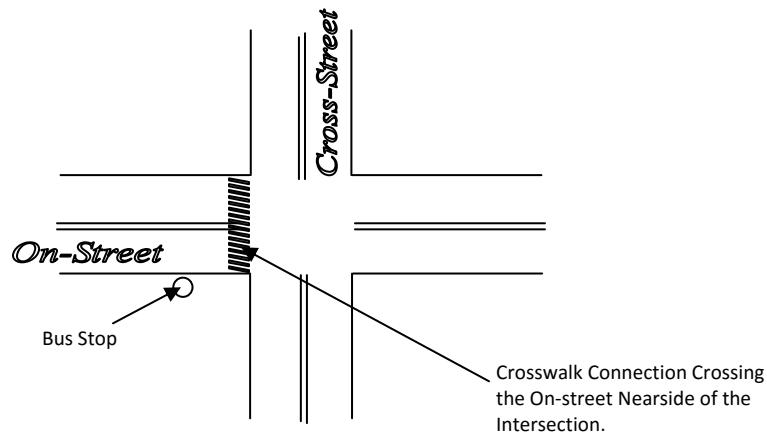

The following four fields are designed to determine if there are marked crosswalks at the stop in the location specified – On-street/Nearside, On-street/Farside, At-street/At Stop, or At Street/Opposite Side.

Crosswalk OSNS

Marked crosswalk along the on-street (the street the bus is traveling on) nearside of the intersection or stop (if it is a mid-block stop).

Valid designations are:

- Yes
- No

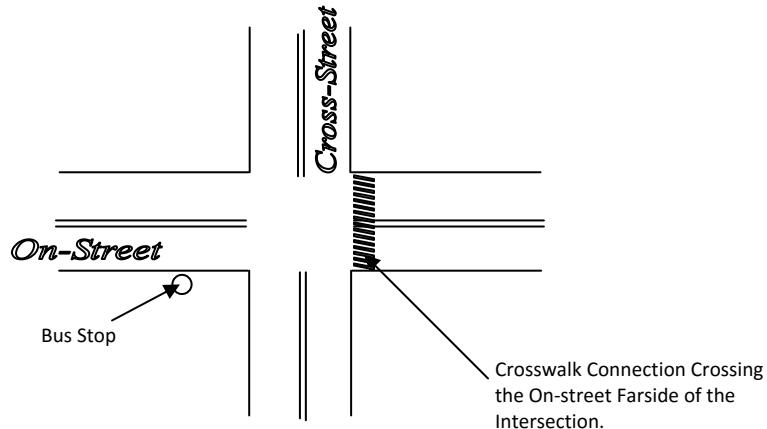

Crosswalk OSFS

Crosswalk that cross the on-street (the street the bus is traveling on) farside of the intersection.

Valid designations are:

- Yes
- No
- N/A

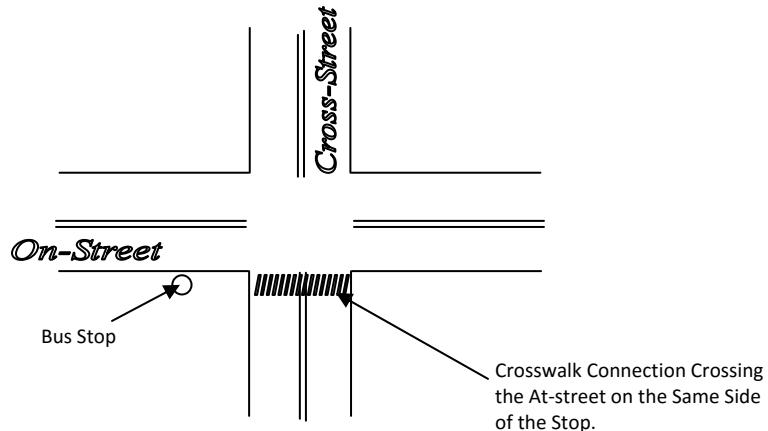

Crosswalk CSAS

Crosswalk that cross the cross-street on the same side of the street as the bus stop location.

Valid designations are:

- Yes
- No
- N/A

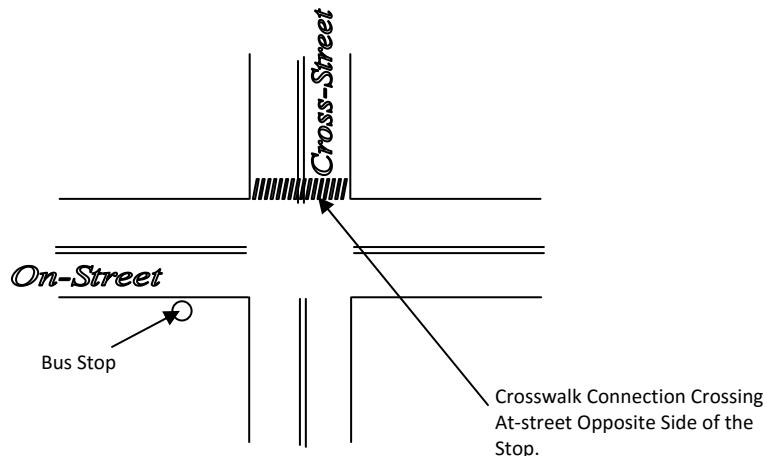

Crosswalk CSOP

Crosswalk that cross the cross-street on the opposite side of the intersection where the bus stop is located.

Valid designations are:

- Yes
- No
- N/A

Traffic Control Device OS

Identify if there is a traffic control device for the on-street at the intersection nearest the bus stop.

Valid designations are:

- Traffic Light
- Stop Sign
- None

Traffic Control Device CS

Identify if there is a traffic control device for the cross-street at the intersection nearest the bus stop.

Valid designations are:

- Traffic Light
- Stop Sign
- None
- N/A

Pedestrian Control OS

Identify if there is a pedestrian crossing signal to cross the on-street.

Valid designations are:

- Yes
- No

Pedestrian Control CS

Identify if there is a pedestrian control signal to cross the cross-street.

Valid designations are:

- Yes
- No
- N/A

Curbside Parking

Identify if the curb adjacent to the bus stop is painted in a color.

Valid designations are:

- Yes
- No
- N/A

Trash Can

Identify if there is a trash receptacle at the bus stop.

Valid designations are:

- Yes
- No

Trash Can Installation

Identify how the trash receptacle is installed at the bus stop.

Valid designations are:

- Freestanding
- Attached to Shelter
- Attached to Ground
- Attached to Bus Pole
- Other

Trash Comments

Freeform notes field to capture miscellaneous information about trash-related issues.

Vendor Publication Box

Identify the number of vendor publication boxes at the bus stop.

Valid designations are: 0-10

Vendor Publication Box Obstruction

Identify if the vendor publication box(es) pose an obstruction at the stop. (Can be obstructing sidewalk, pedestrian pad, information case, shelter access, etc.)

Valid designations are:

- Yes
- No

Vendor Publication Box Install

Identify how the vendor publication box(es) are secured at the bus stop?

Valid designations are:

- Freestanding
- Chained to Shelter
- Chained to Bus Pole
- Chained to Trash Can
- Chained to Tree
- Bolted to Ground
- Other

Bike Racks

Identify if there are bike racks at the bus stop.

Valid designations are:

- Yes
- No

APPENDIX B
